WORLD RISK POLL

The quiet hazards: How everyday risk shapes daily life

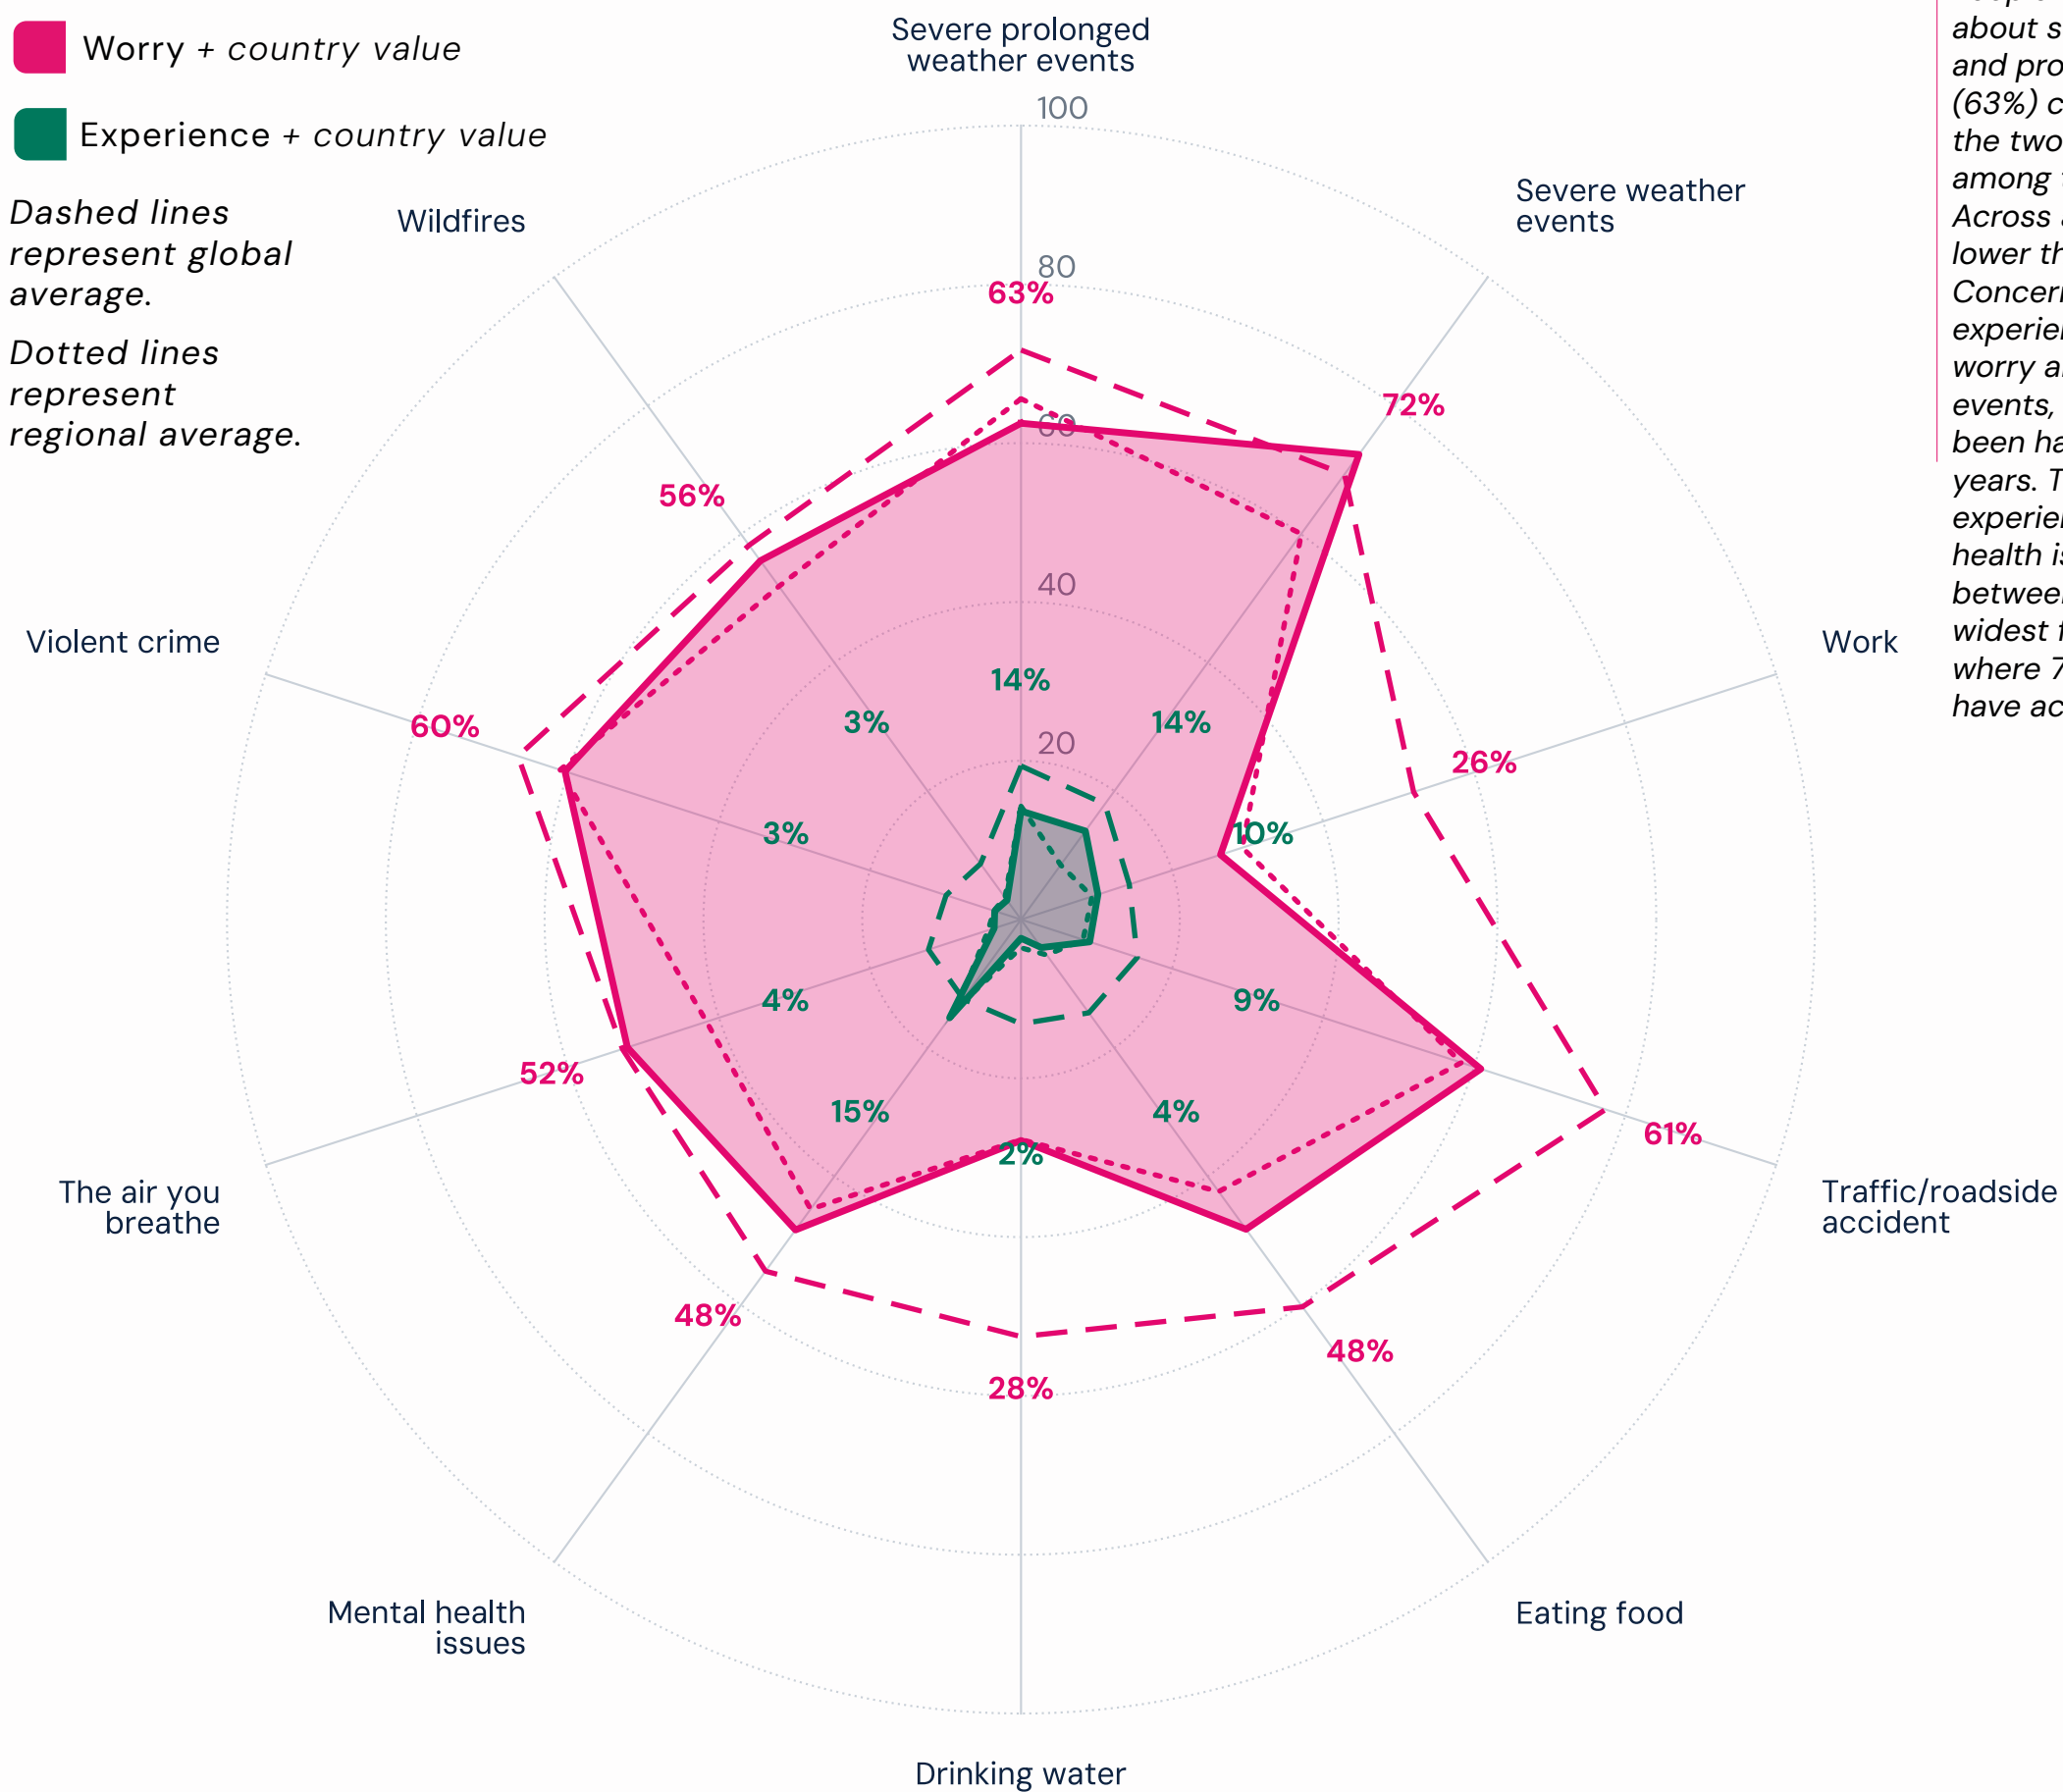

Worry and experience of harm from everyday risks

Worry + country value

Experience + country value

Dashed lines represent global average.

Dotted lines represent regional average.

People in Austria are most worried about severe weather events (72%) and prolonged severe weather (63%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Austria runs lower than the global average. Concern far outstrips lived experience, however: while 72% worry about severe weather events, only 14% have actually been harmed by it in the past two years. The harm most commonly experienced in Austria is mental health issues (15%). The gap between worry and experience is widest for severe weather events, where 72% are worried but 14% have actually been affected.
