

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

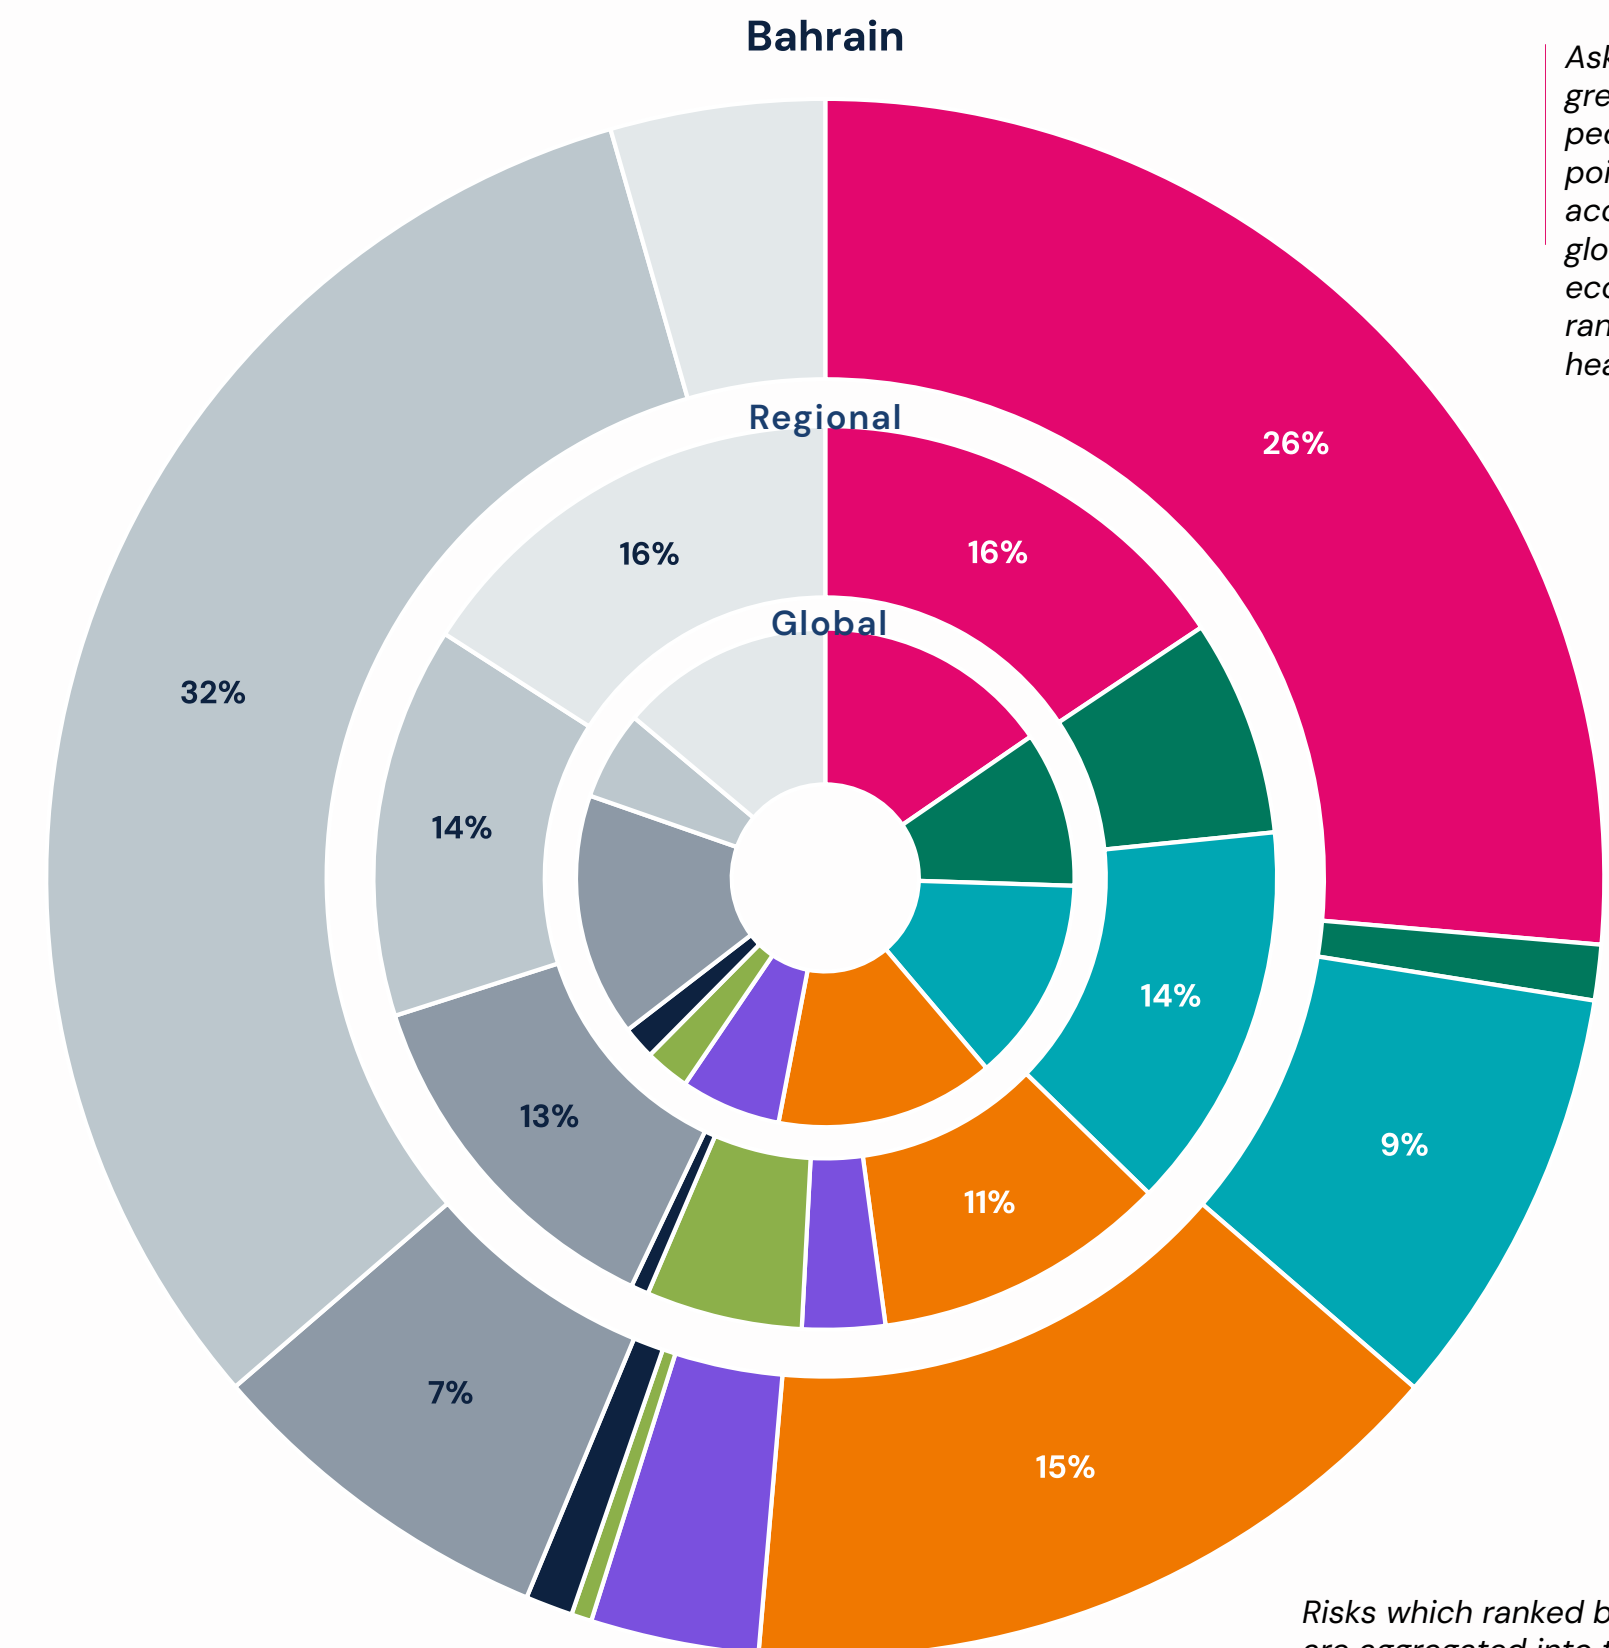

Dashed lines represent global average.
Dotted lines represent regional average.

People in Bahrain are most worried about road and traffic accidents (62%) and prolonged severe weather (45%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Bahrain runs lower than the global average. Concern far outstrips lived experience, however: while 62% worry about road and traffic accidents, only 20% have actually been harmed by it in the past two years. The harm most commonly experienced in Bahrain is road and traffic accidents (20%). The gap between worry and experience is widest for road and traffic accidents, where 62% are worried but 20% have actually been affected.
