

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

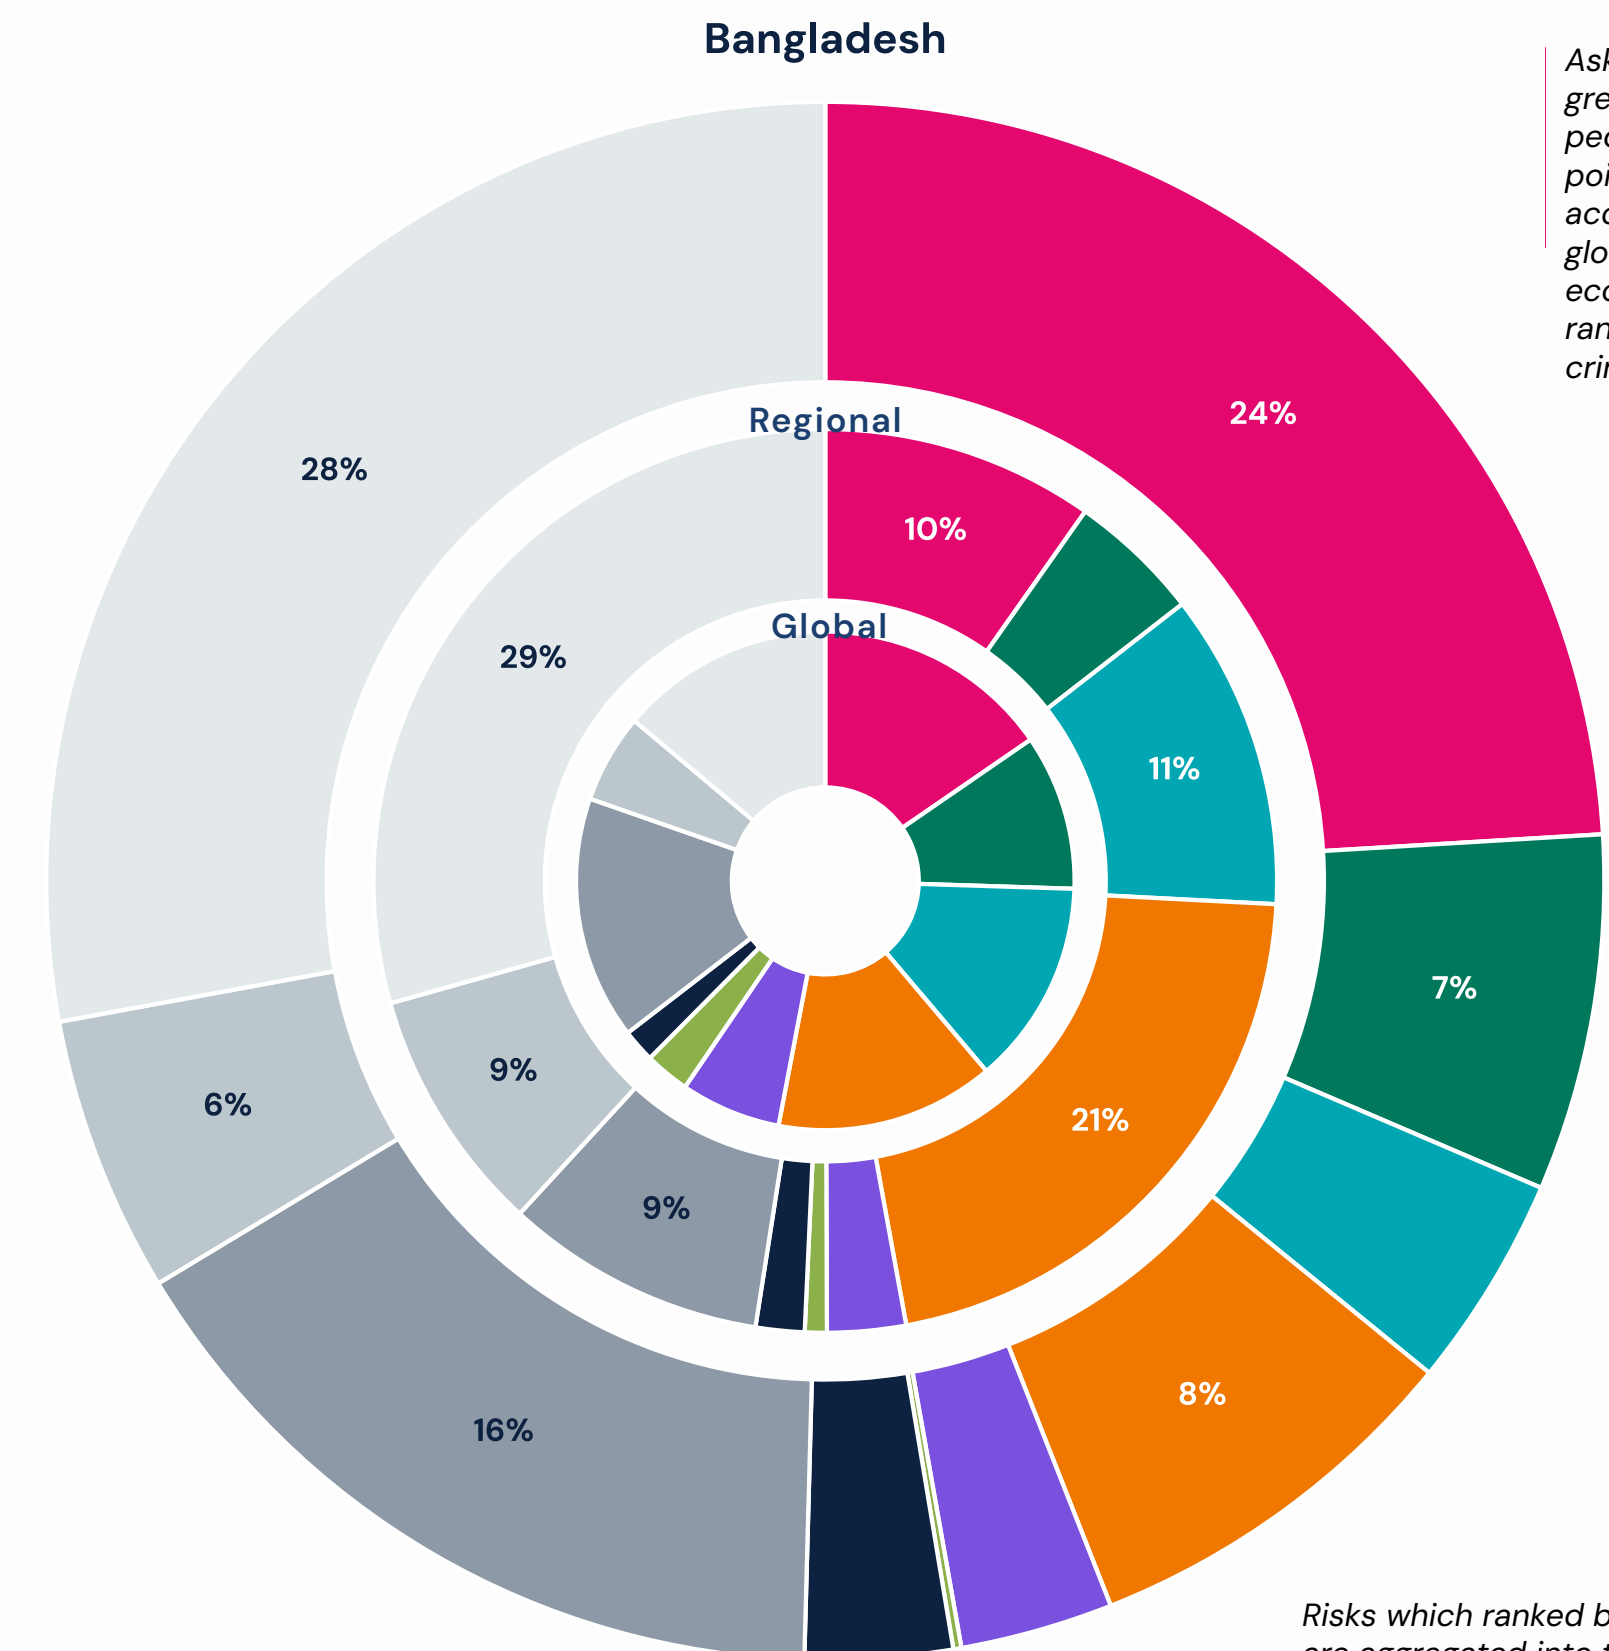

Dashed lines represent global average.
Dotted lines represent regional average.

People in Bangladesh are most worried about road and traffic accidents (85%) and severe weather events (84%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Bangladesh runs higher than the global average. Concern far outstrips lived experience, however: while 85% worry about road and traffic accidents, only 10% have actually been harmed by it in the past two years. The harm most commonly experienced in Bangladesh is severe weather events (26%). The gap between worry and experience is widest for road and traffic accidents, where 85% are worried but 10% have actually been affected.
