

Worry and experience of harm from everyday risks

People in Benin are most worried about road and traffic accidents (85%) and prolonged severe weather (78%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Benin runs higher than the global average. Concern far outstrips lived experience, however: while 85% worry about road and traffic accidents, only 13% have actually been harmed by it in the past two years. The harm most commonly experienced in Benin is prolonged severe weather (24%). The gap between worry and experience is widest for road and traffic accidents, where 85% are worried but 13% have actually been affected.

Top of mind risk to safety

Asked to name the single greatest risk to their daily safety, people in Benin most often point to the economy and personal finances (36%), above the global figure of 14%. Health problems ranks second (20%), followed by road and transport accidents (10%).

Risks which ranked below 2% of the global average are aggregated into this 'Other risks' category.
