

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

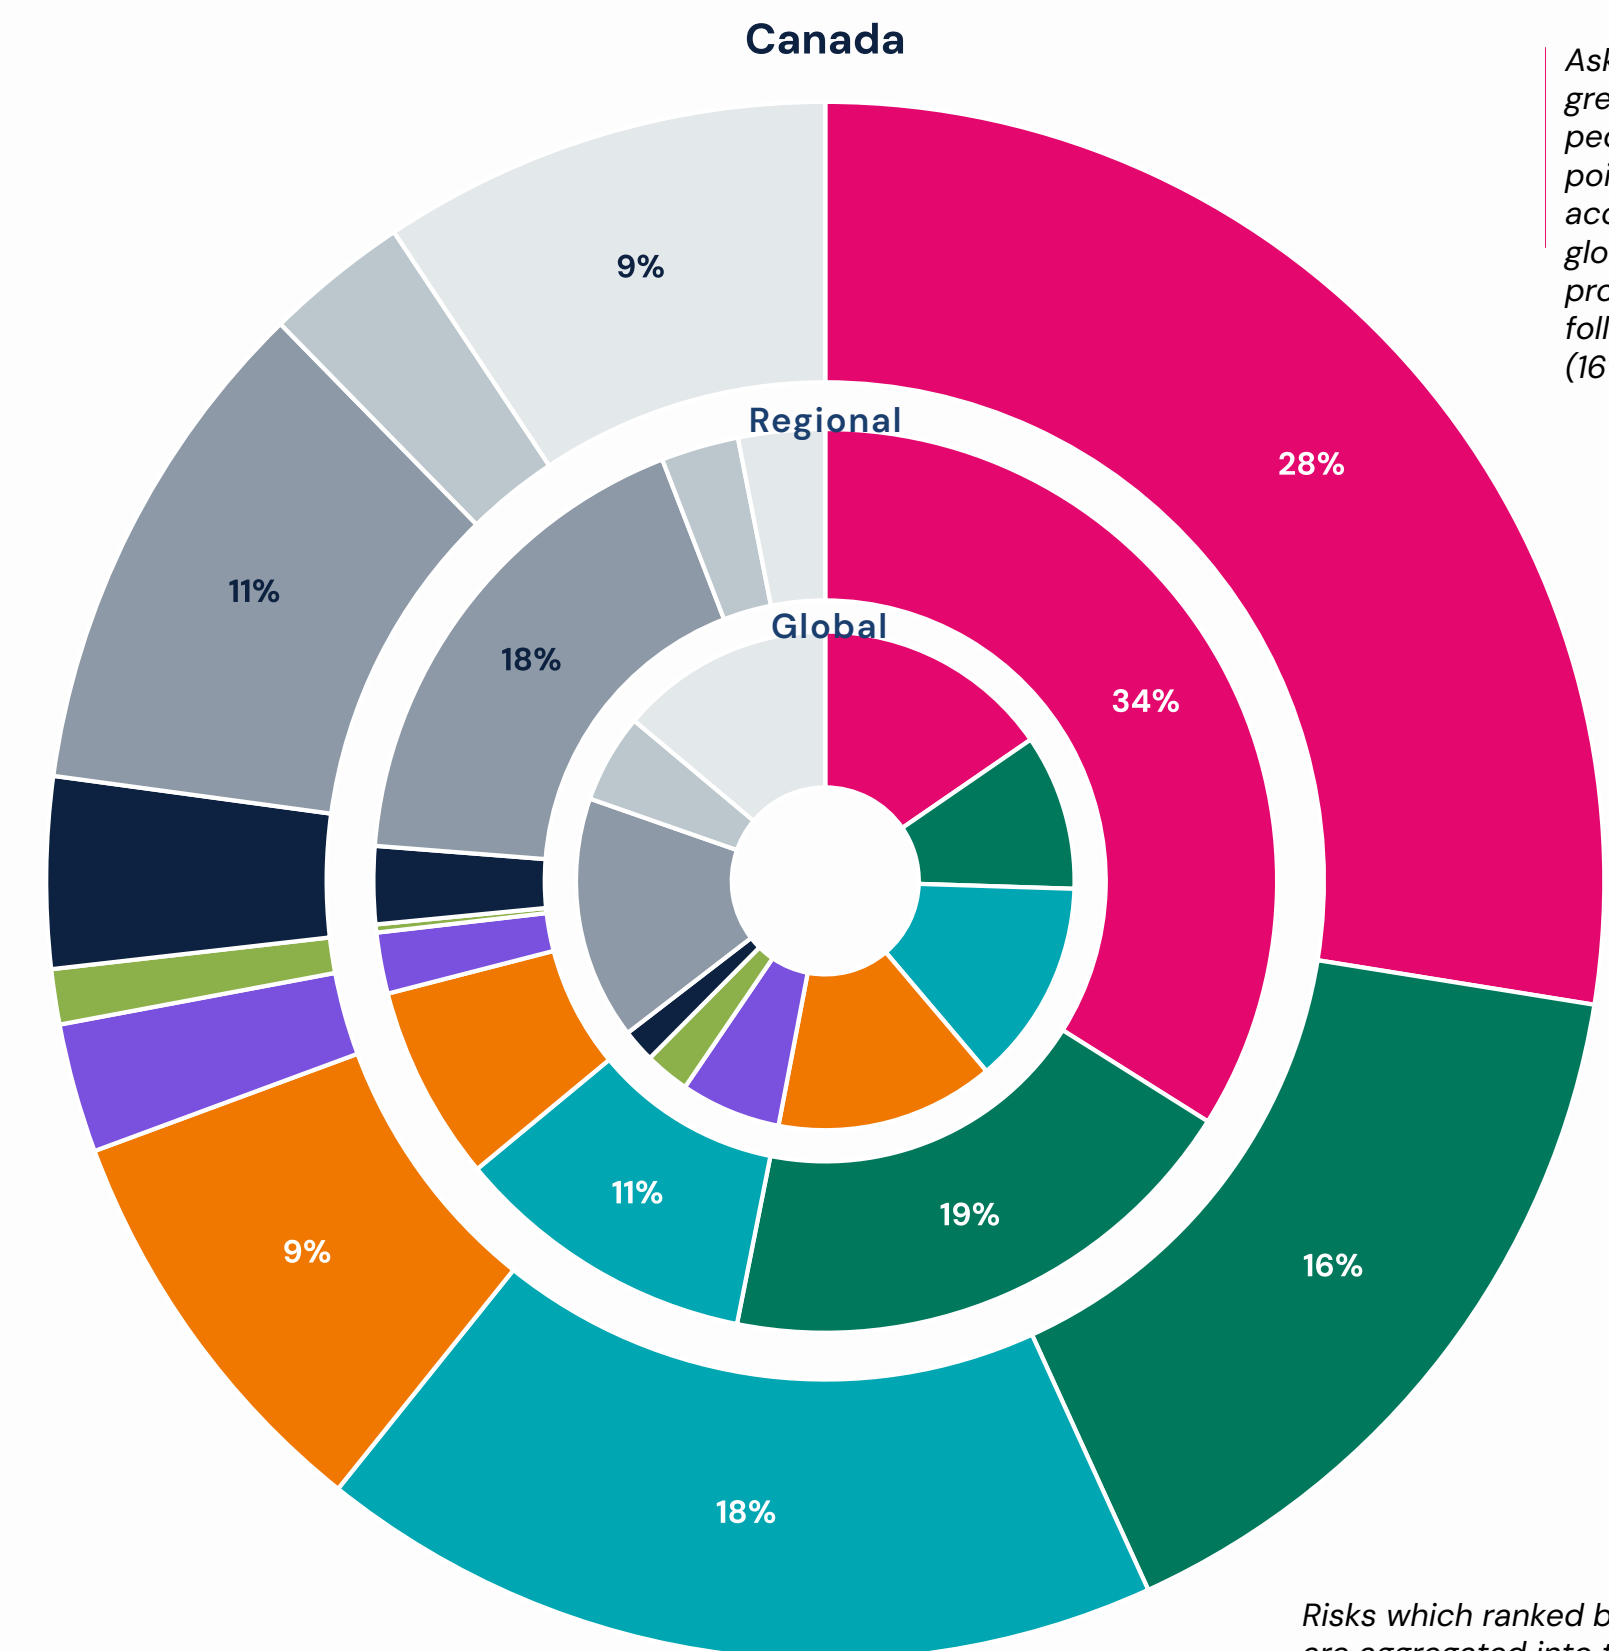

Dashed lines represent global average.
Dotted lines represent regional average.

People in Canada are most worried about wildfires (73%) and road and traffic accidents (70%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Canada runs lower than the global average. Concern far outstrips lived experience, however: while 73% worry about wildfires, only 9% have actually been harmed by it in the past two years. The harm most commonly experienced in Canada is prolonged severe weather (19%). The gap between worry and experience is widest for wildfires, where 73% are worried but 9% have actually been affected.
