

## Worry and experience of harm from everyday risks

Worry + country value  
Experience + country value

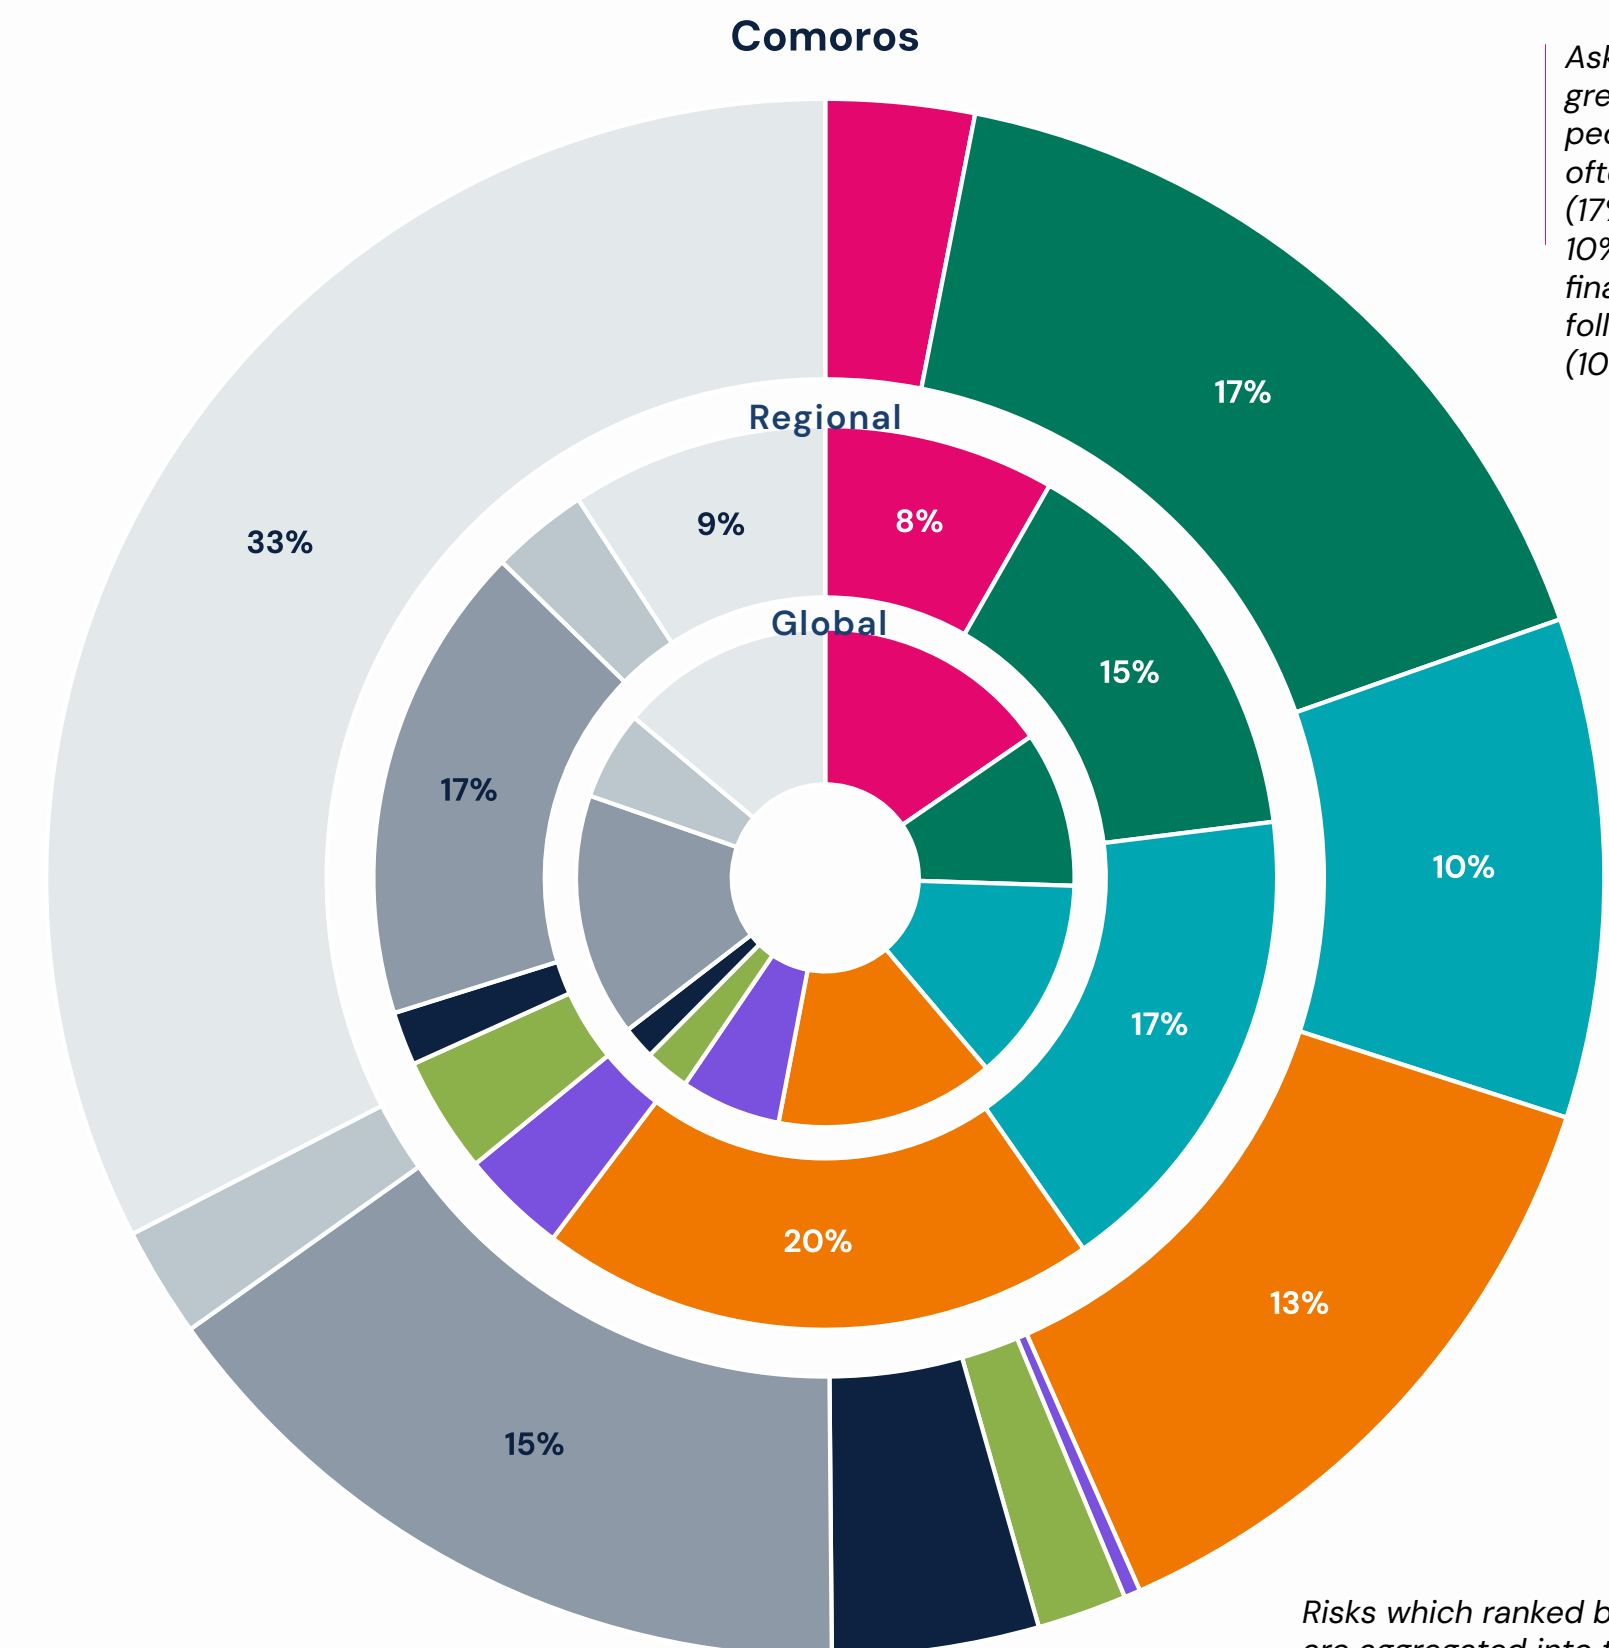

Dashed lines represent global average.  
Dotted lines represent regional average.

People in the Comoros are most worried about severe weather events (85%) and prolonged severe weather (85%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in the Comoros runs higher than the global average. Concern far outstrips lived experience, however: while 85% worry about severe weather events, only 37% have actually been harmed by it in the past two years. The harm most commonly experienced in the Comoros is prolonged severe weather (46%). The gap between worry and experience is widest for violent crime, where 84% are worried but 16% have actually been affected.
