

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

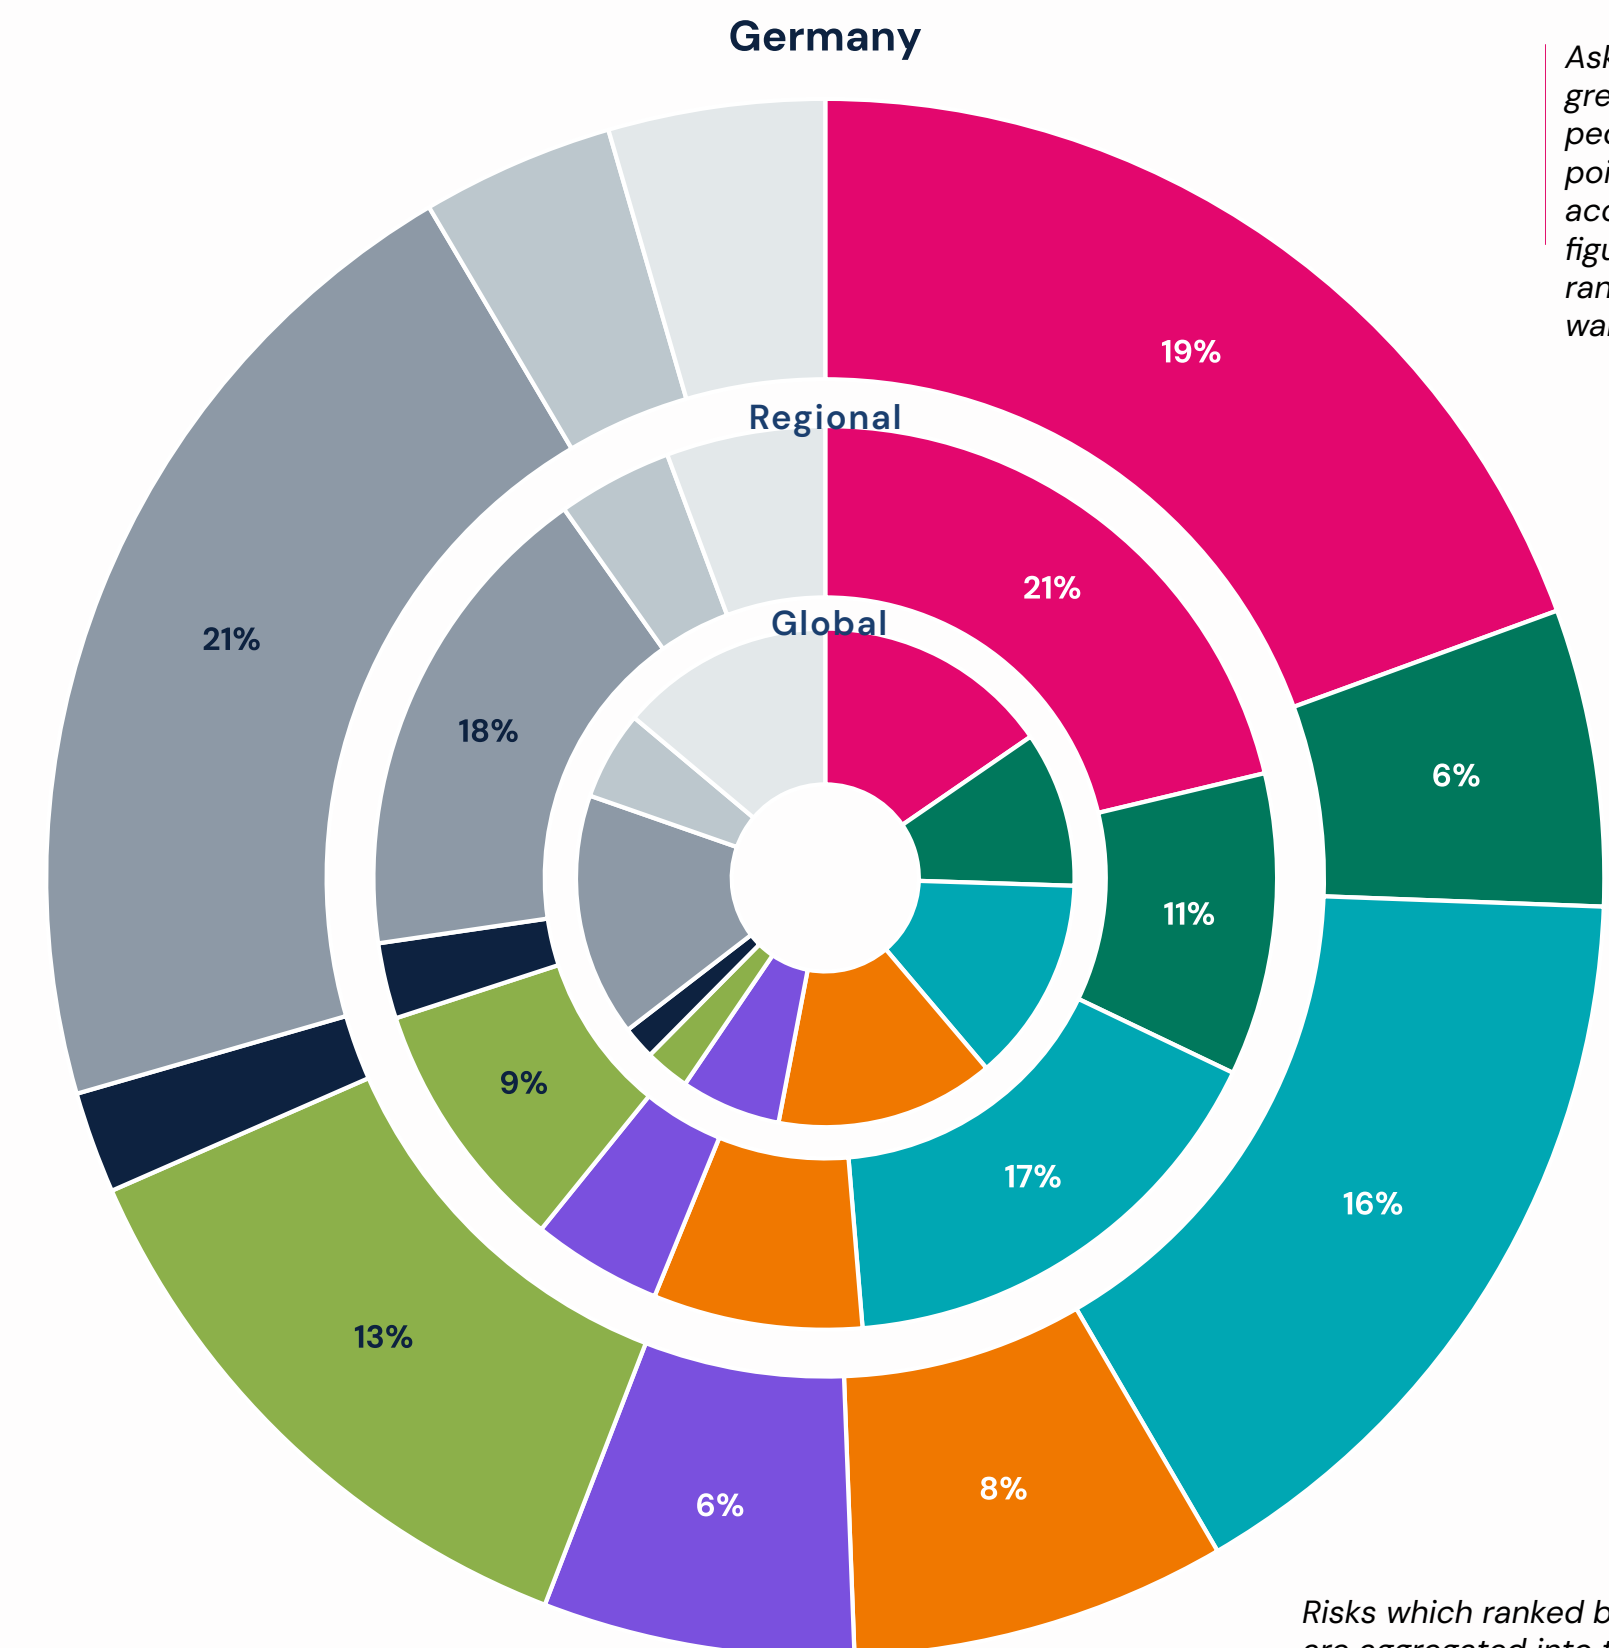

Dashed lines represent global average.
Dotted lines represent regional average.

People in Germany are most worried about prolonged severe weather (75%) and severe weather events (71%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Germany runs lower than the global average. Concern far outstrips lived experience, however: while 75% worry about prolonged severe weather, only 13% have actually been harmed by it in the past two years. The harm most commonly experienced in Germany is mental health issues (18%). The gap between worry and experience is widest for wildfires, where 66% are worried but 4% have actually been affected.

Top of mind risk to safety

Road and transport
