

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

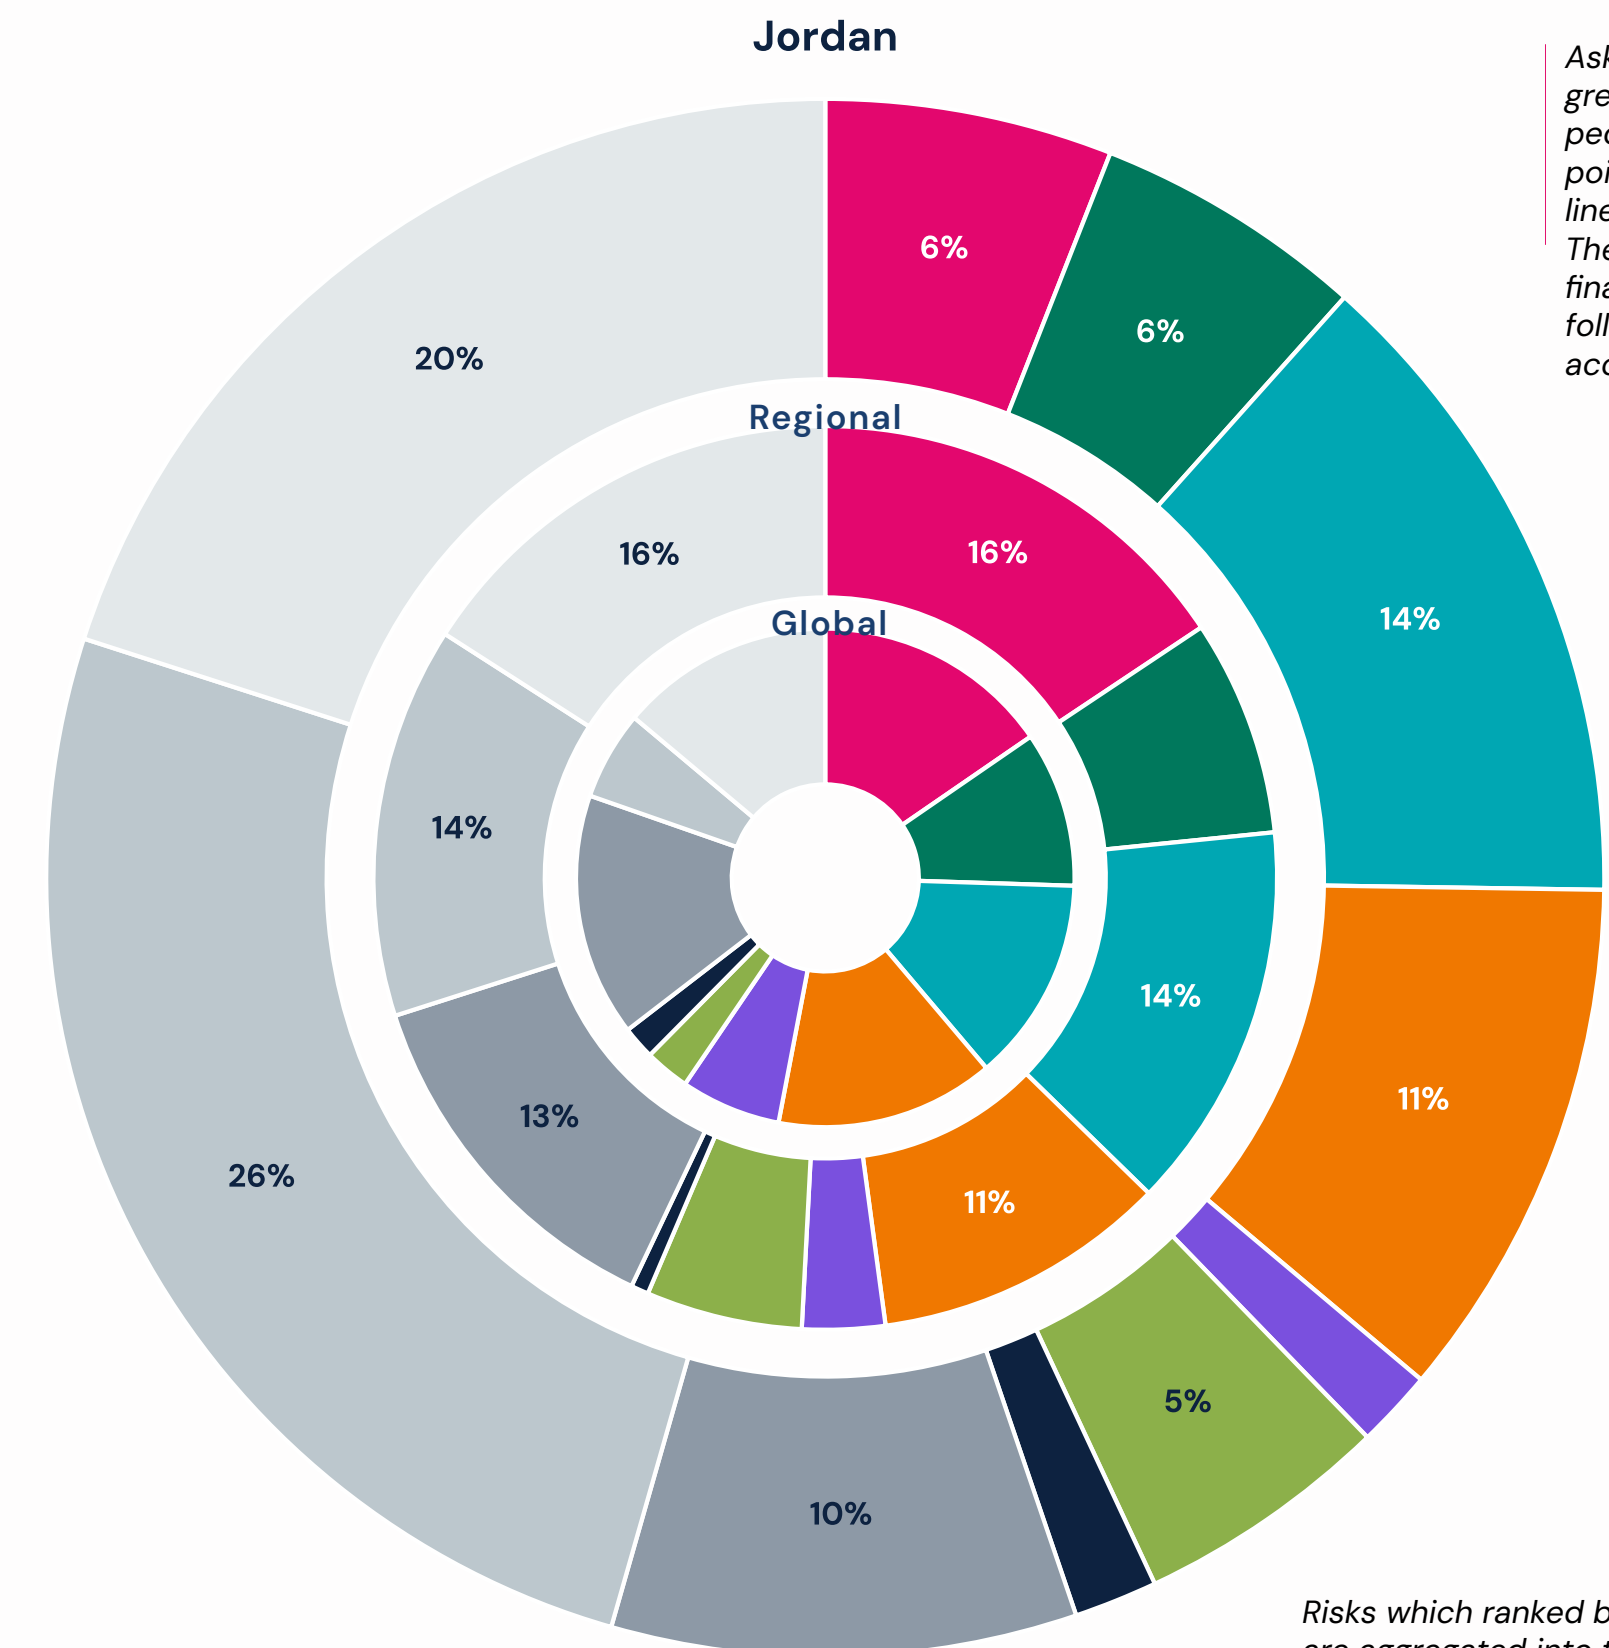

Dashed lines represent global average.
Dotted lines represent regional average.

People in Jordan are most worried about road and traffic accidents (76%) and prolonged severe weather (72%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Jordan runs lower than the global average. Concern far outstrips lived experience, however: while 76% worry about road and traffic accidents, only 9% have actually been harmed by it in the past two years. The harm most commonly experienced in Jordan is the food they eat (13%). The gap between worry and experience is widest for road and traffic accidents, where 76% are worried but 9% have actually been affected.
