

Worry and experience of harm from everyday risks

People in Kyrgyzstan are most worried about road and traffic accidents (85%) and prolonged severe weather (79%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Kyrgyzstan runs higher than the global average. Concern far outstrips lived experience, however: while 85% worry about road and traffic accidents, only 5% have actually been harmed by it in the past two years. The harm most commonly experienced in Kyrgyzstan is the food they eat (8%). The gap between worry and experience is widest for road and traffic accidents, where 85% are worried but 5% have actually been affected.

Top of mind risk to safety

Asked to name the single greatest risk to their daily safety, people in Kyrgyzstan most often point to health problems (23%), above the global figure of 13%. Road and transport accidents ranks second (19%), followed by the economy and personal finances (15%).

Risks which ranked below 2% of the global average are aggregated into this 'Other risks' category.
