

Worry and experience of harm from everyday risks

People in Montenegro are most worried about road and traffic accidents (73%) and the food they eat (63%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Montenegro runs lower than the global average. Concern far outstrips lived experience, however: while 73% worry about road and traffic accidents, only 8% have actually been harmed by it in the past two years. The harm most commonly experienced in Montenegro is prolonged severe weather (13%). The gap between worry and experience is widest for road and traffic accidents, where 73% are worried but 8% have actually been affected.

Top of mind risk to safety

Asked to name the single greatest risk to their daily safety, people in Montenegro most often point to health problems (24%), above the global figure of 13%. The economy and personal finances ranks second (16%), followed by road and transport accidents (14%).

Risks which ranked below 2% of the global average are aggregated into this 'Other risks' category.
