

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

Dashed lines represent global average.
Dotted lines represent regional average.

People in Oman are most worried about road and traffic accidents (51%) and the food they eat (42%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Oman runs lower than the global average. Concern far outstrips lived experience, however: while 51% worry about road and traffic accidents, only 16% have actually been harmed by it in the past two years. The harm most commonly experienced in Oman is road and traffic accidents (16%). The gap between worry and experience is widest for road and traffic accidents, where 51% are worried but 16% have actually been affected.
