

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

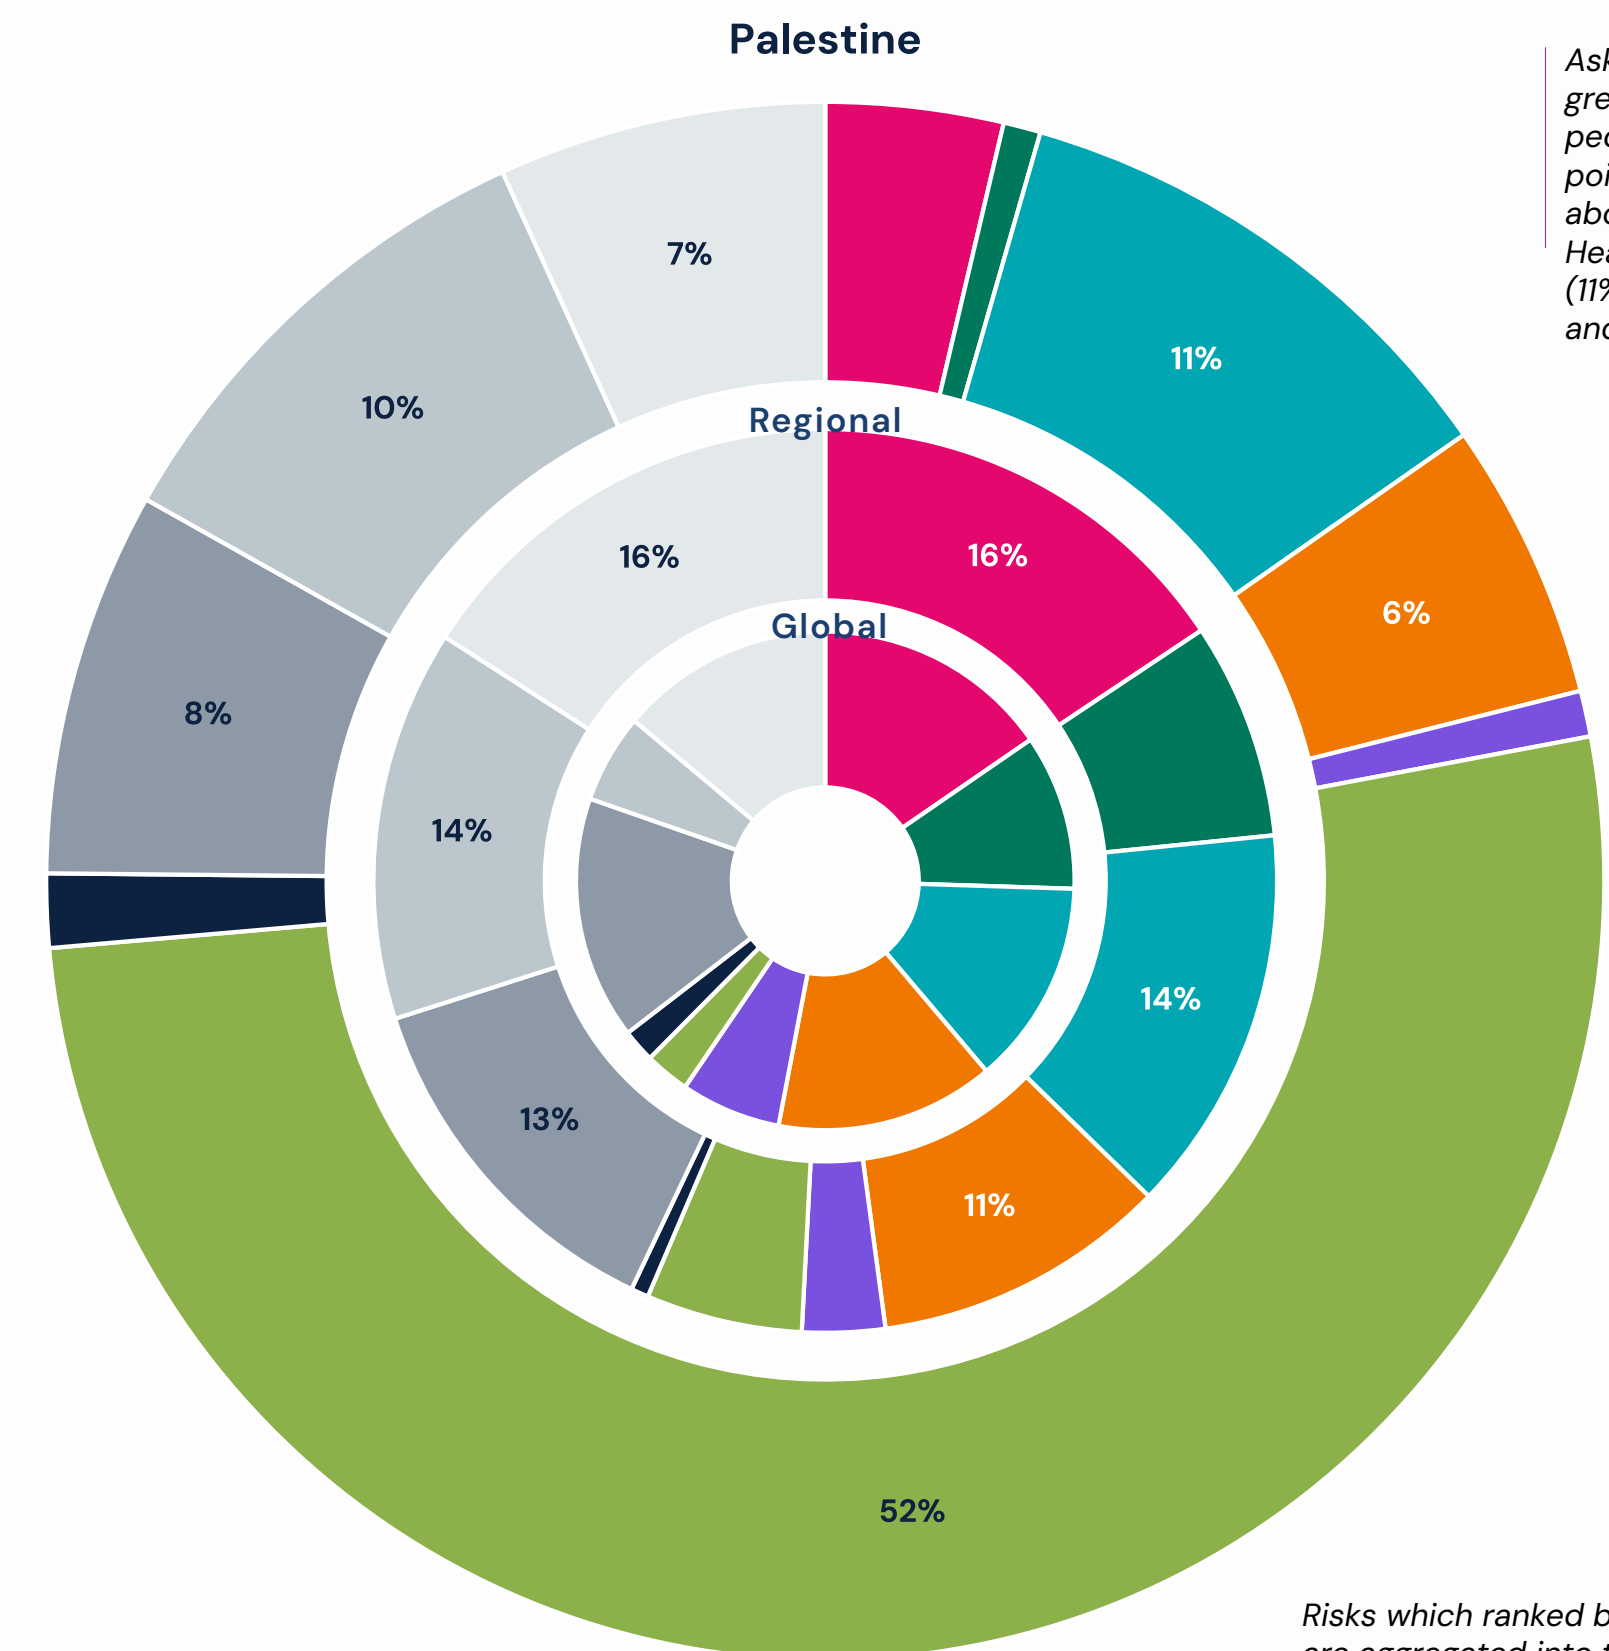

Dashed lines represent global average.
Dotted lines represent regional average.

People in Palestine are most worried about road and traffic accidents (80%) and wildfires (74%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Palestine runs lower than the global average. Concern far outstrips lived experience, however: while 80% worry about road and traffic accidents, only 10% have actually been harmed by it in the past two years. The harm most commonly experienced in Palestine is the work they do (13%). The gap between worry and experience is widest for road and traffic accidents, where 80% are worried but 10% have actually been affected.
