

## Worry and experience of harm from everyday risks

Worry + country value  
Experience + country value

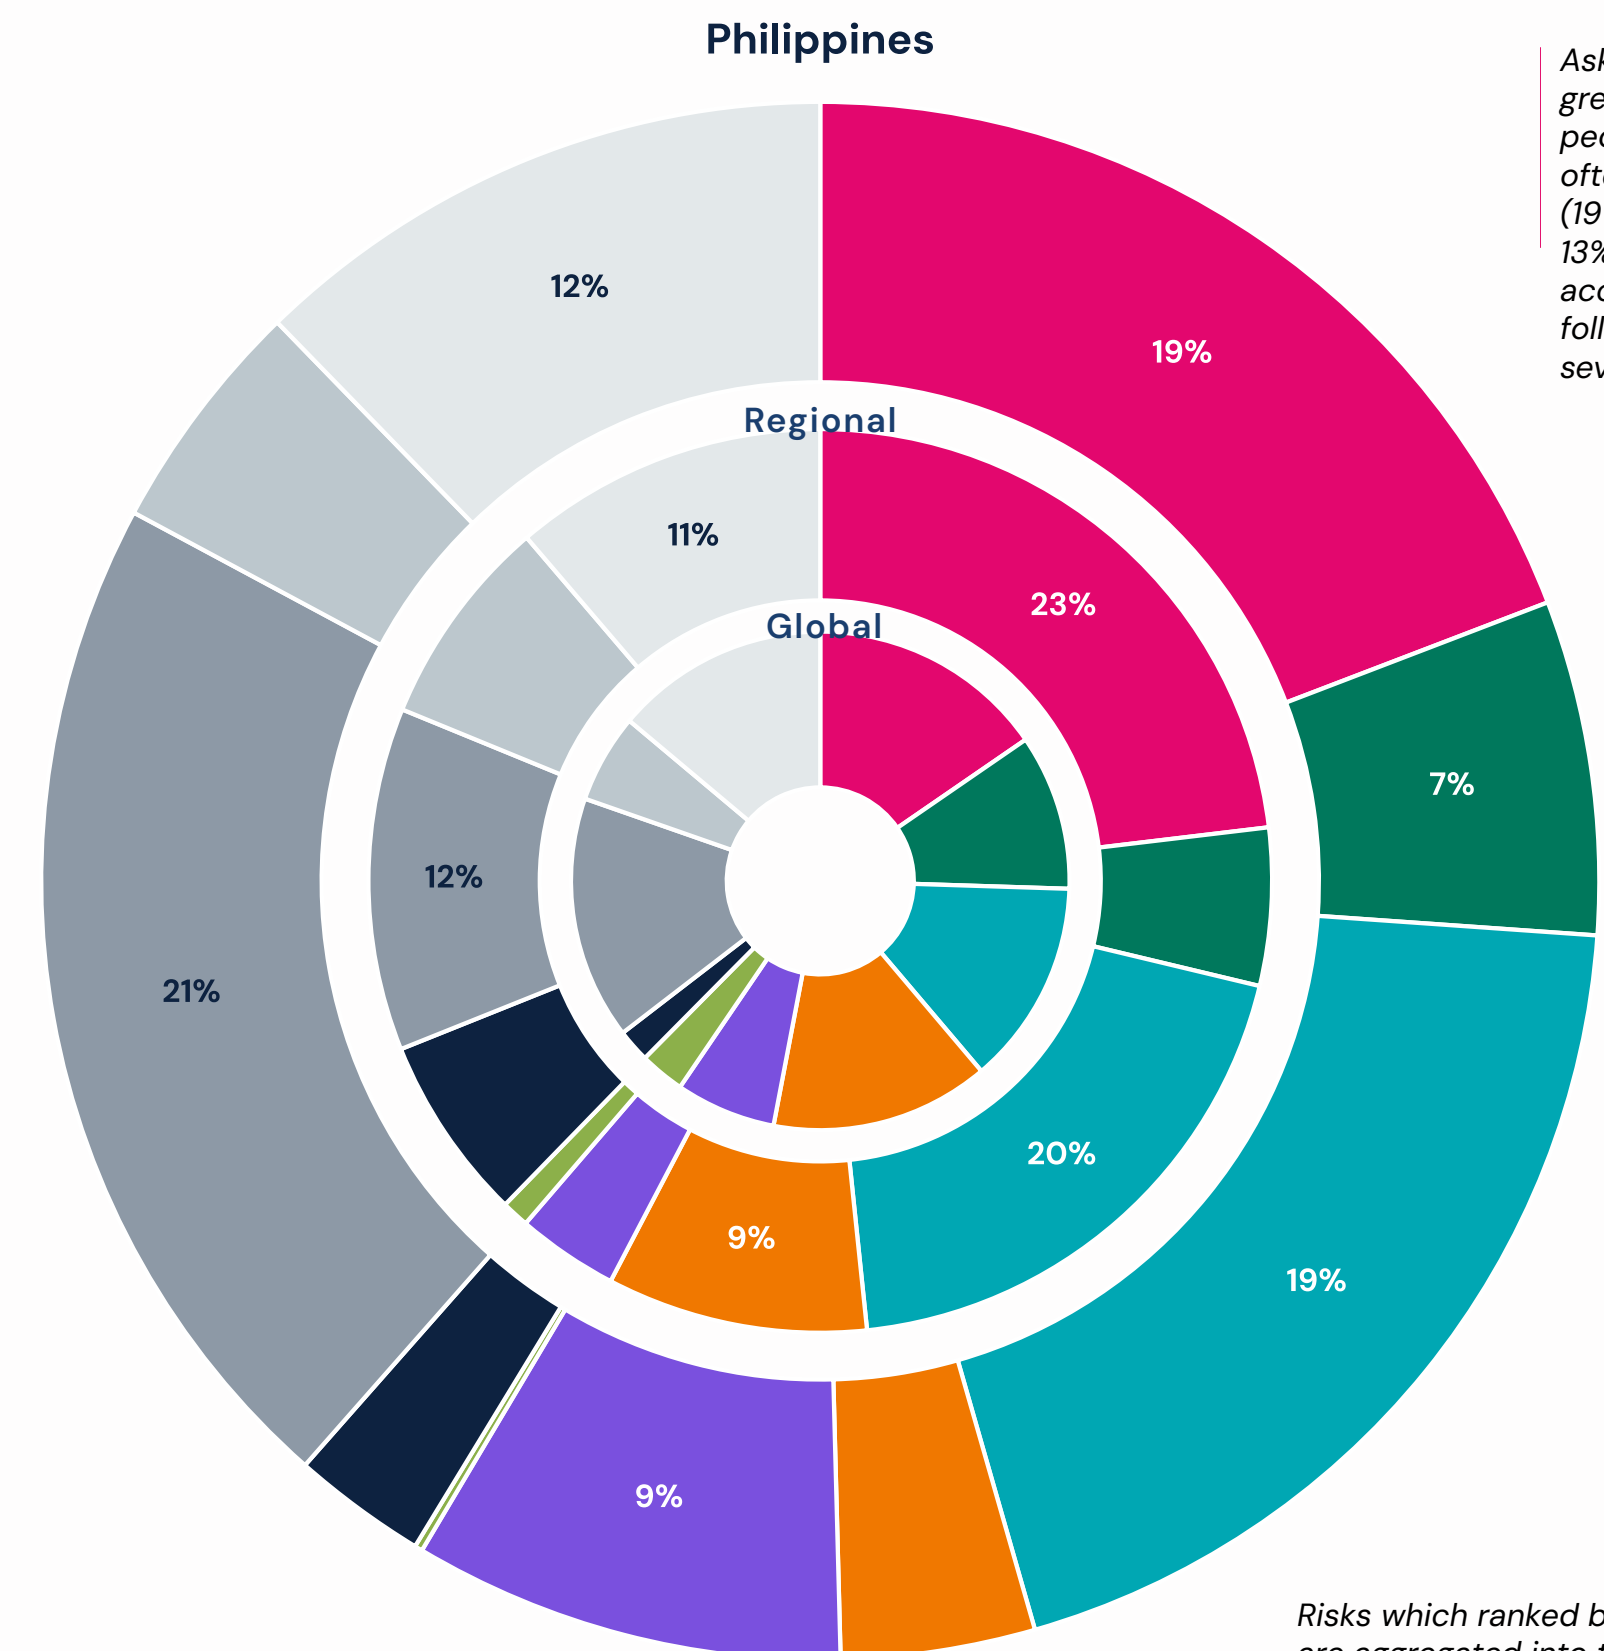

Dashed lines represent global average.  
Dotted lines represent regional average.

People in the Philippines are most worried about severe weather events (98%) and prolonged severe weather (96%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in the Philippines runs higher than the global average. Concern far outstrips lived experience, however: while 98% worry about severe weather events, only 62% have actually been harmed by it in the past two years. The harm most commonly experienced in the Philippines is prolonged severe weather (62%). The gap between worry and experience is widest for violent crime, where 88% are worried but 10% have actually been affected.

## Top of mind risk to safety

Road and transport  
Crime and violence  
Health  
Economy and financial  
Climate and severe weather  
War/terrorism  
Work  
Other risks\*  
Nothing/No risk  
Don't know

Asked to name the single greatest risk to their daily safety, people in the Philippines most often point to health problems (19%), above the global figure of 13%. Road and transport accidents ranks second (19%), followed by climate change and severe weather (9%).

Risks which ranked below 2% of the global average are aggregated into this 'Other risks' category.
