

Worry and experience of harm from everyday risks

People in Saudi Arabia are most worried about road and traffic accidents (57%) and prolonged severe weather (44%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Saudi Arabia runs lower than the global average. Concern far outstrips lived experience, however: while 57% worry about road and traffic accidents, only 10% have actually been harmed by it in the past two years. The harm most commonly experienced in Saudi Arabia is road and traffic accidents (10%). The gap between worry and experience is widest for road and traffic accidents, where 57% are worried but 10% have actually been affected.

Top of mind risk to safety

Asked to name the single greatest risk to their daily safety, people in Saudi Arabia most often point to road and transport accidents (40%), above the global figure of 15%. Health problems ranks second (12%), followed by crime and violence (4%).

Risks which ranked below 2% of the global average are aggregated into this 'Other risks' category.
