

## Worry and experience of harm from everyday risks

Worry + country value  
Experience + country value

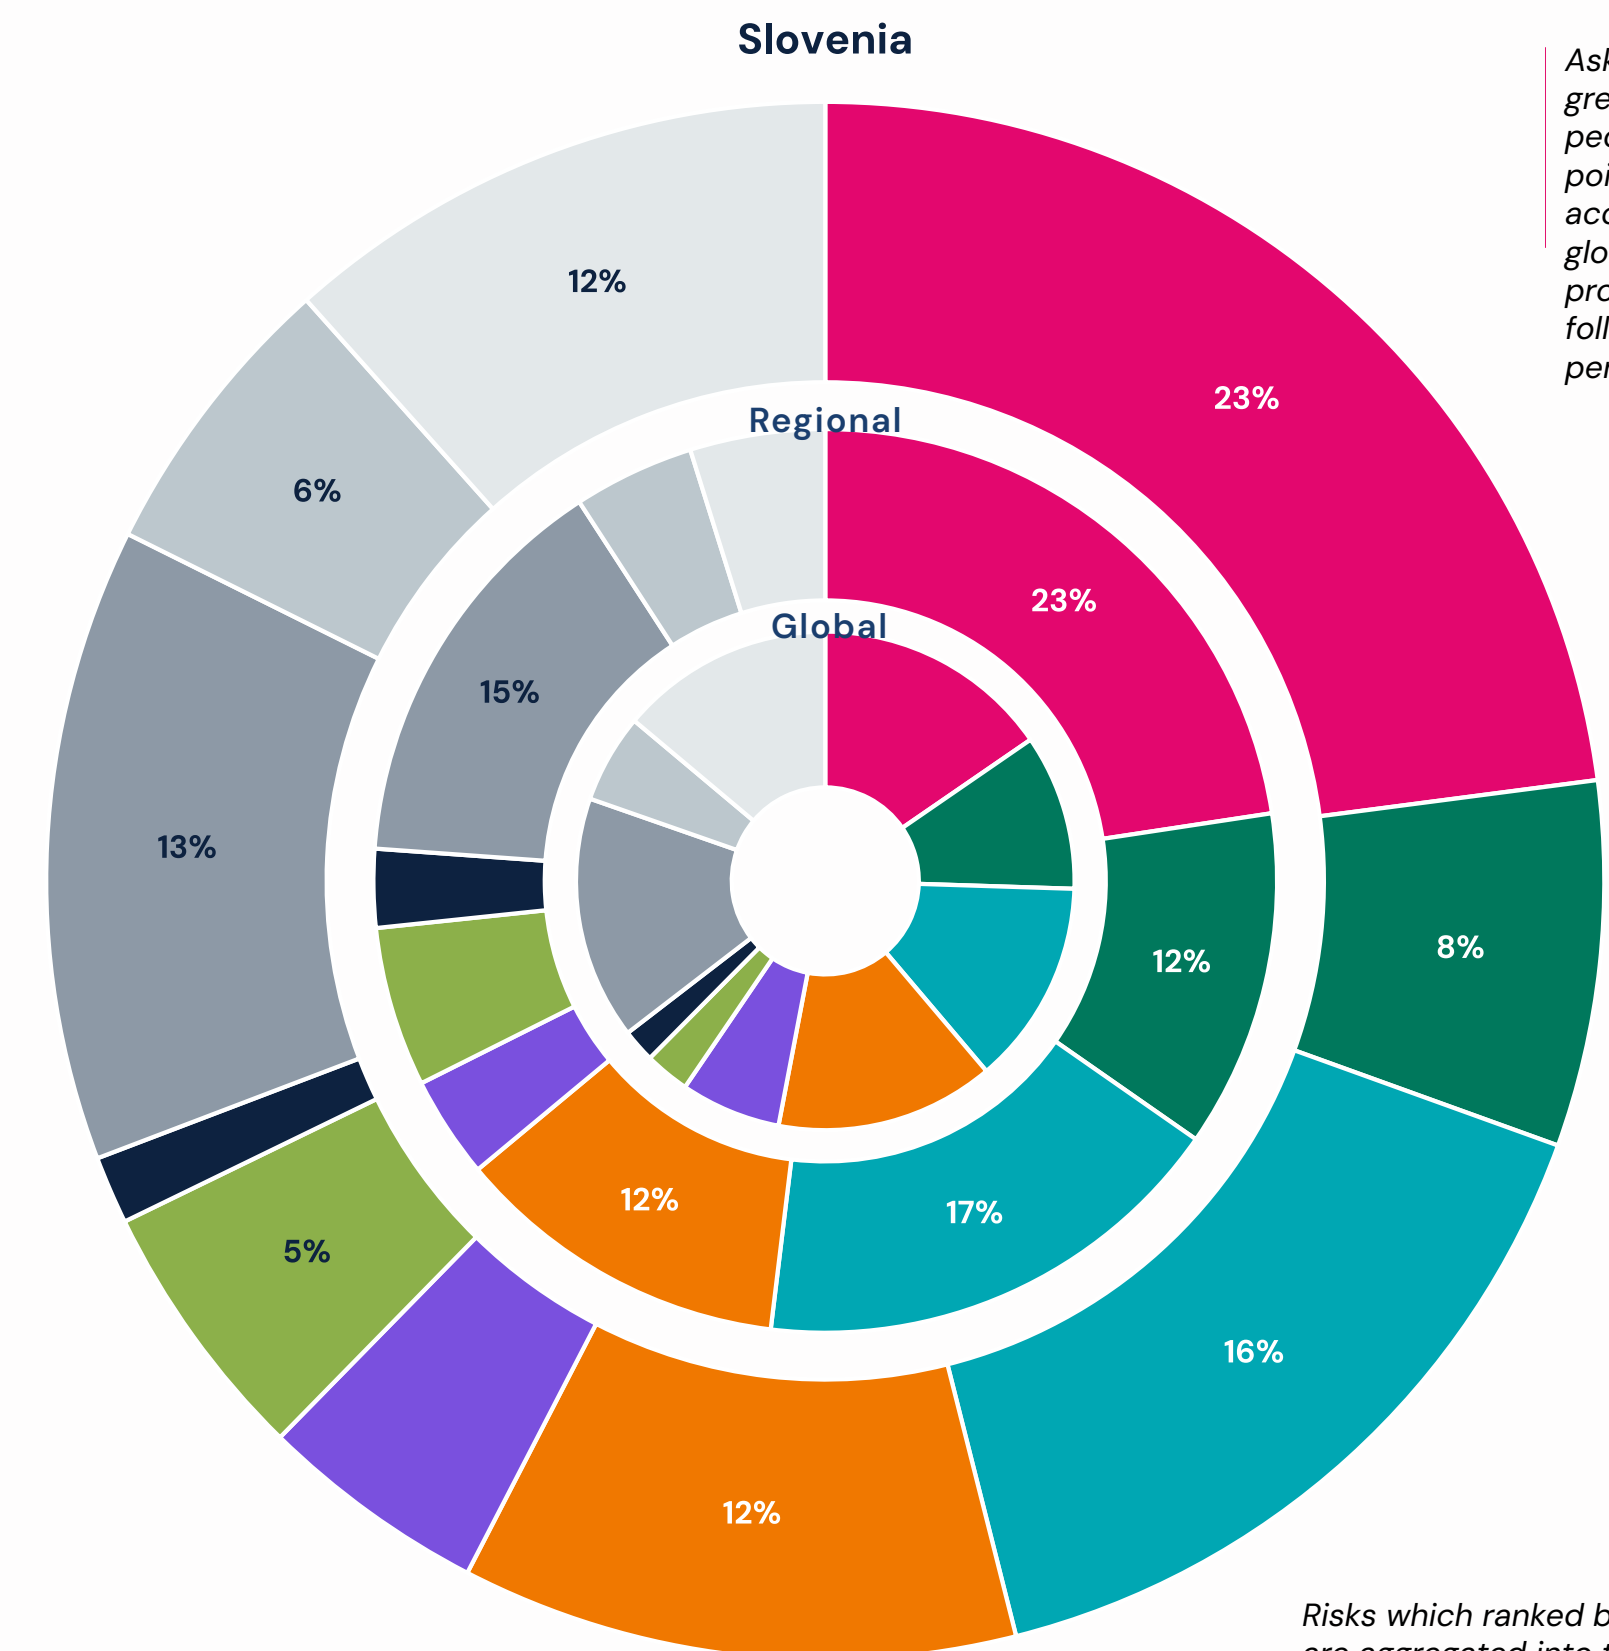

Dashed lines represent global average.  
Dotted lines represent regional average.

People in Slovenia are most worried about prolonged severe weather (82%) and severe weather events (77%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Slovenia runs lower than the global average. Concern far outstrips lived experience, however: while 82% worry about prolonged severe weather, only 7% have actually been harmed by it in the past two years. The harm most commonly experienced in Slovenia is severe weather events (9%). The gap between worry and experience is widest for prolonged severe weather, where 82% are worried but 7% have actually been affected.

## Top of mind risk to safety

Road and transport  
Crime and violence  
Health  
Economy and financial  
Climate and severe weather  
War/terrorism  
Work  
Other risks\*  
Nothing/No risk  
Don't know

Asked to name the single greatest risk to their daily safety, people in Slovenia most often point to road and transport accidents (23%), above the global figure of 15%. Health problems ranks second (16%), followed by the economy and personal finances (12%).

Risks which ranked below 2% of the global average are aggregated into this 'Other risks' category.
