

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

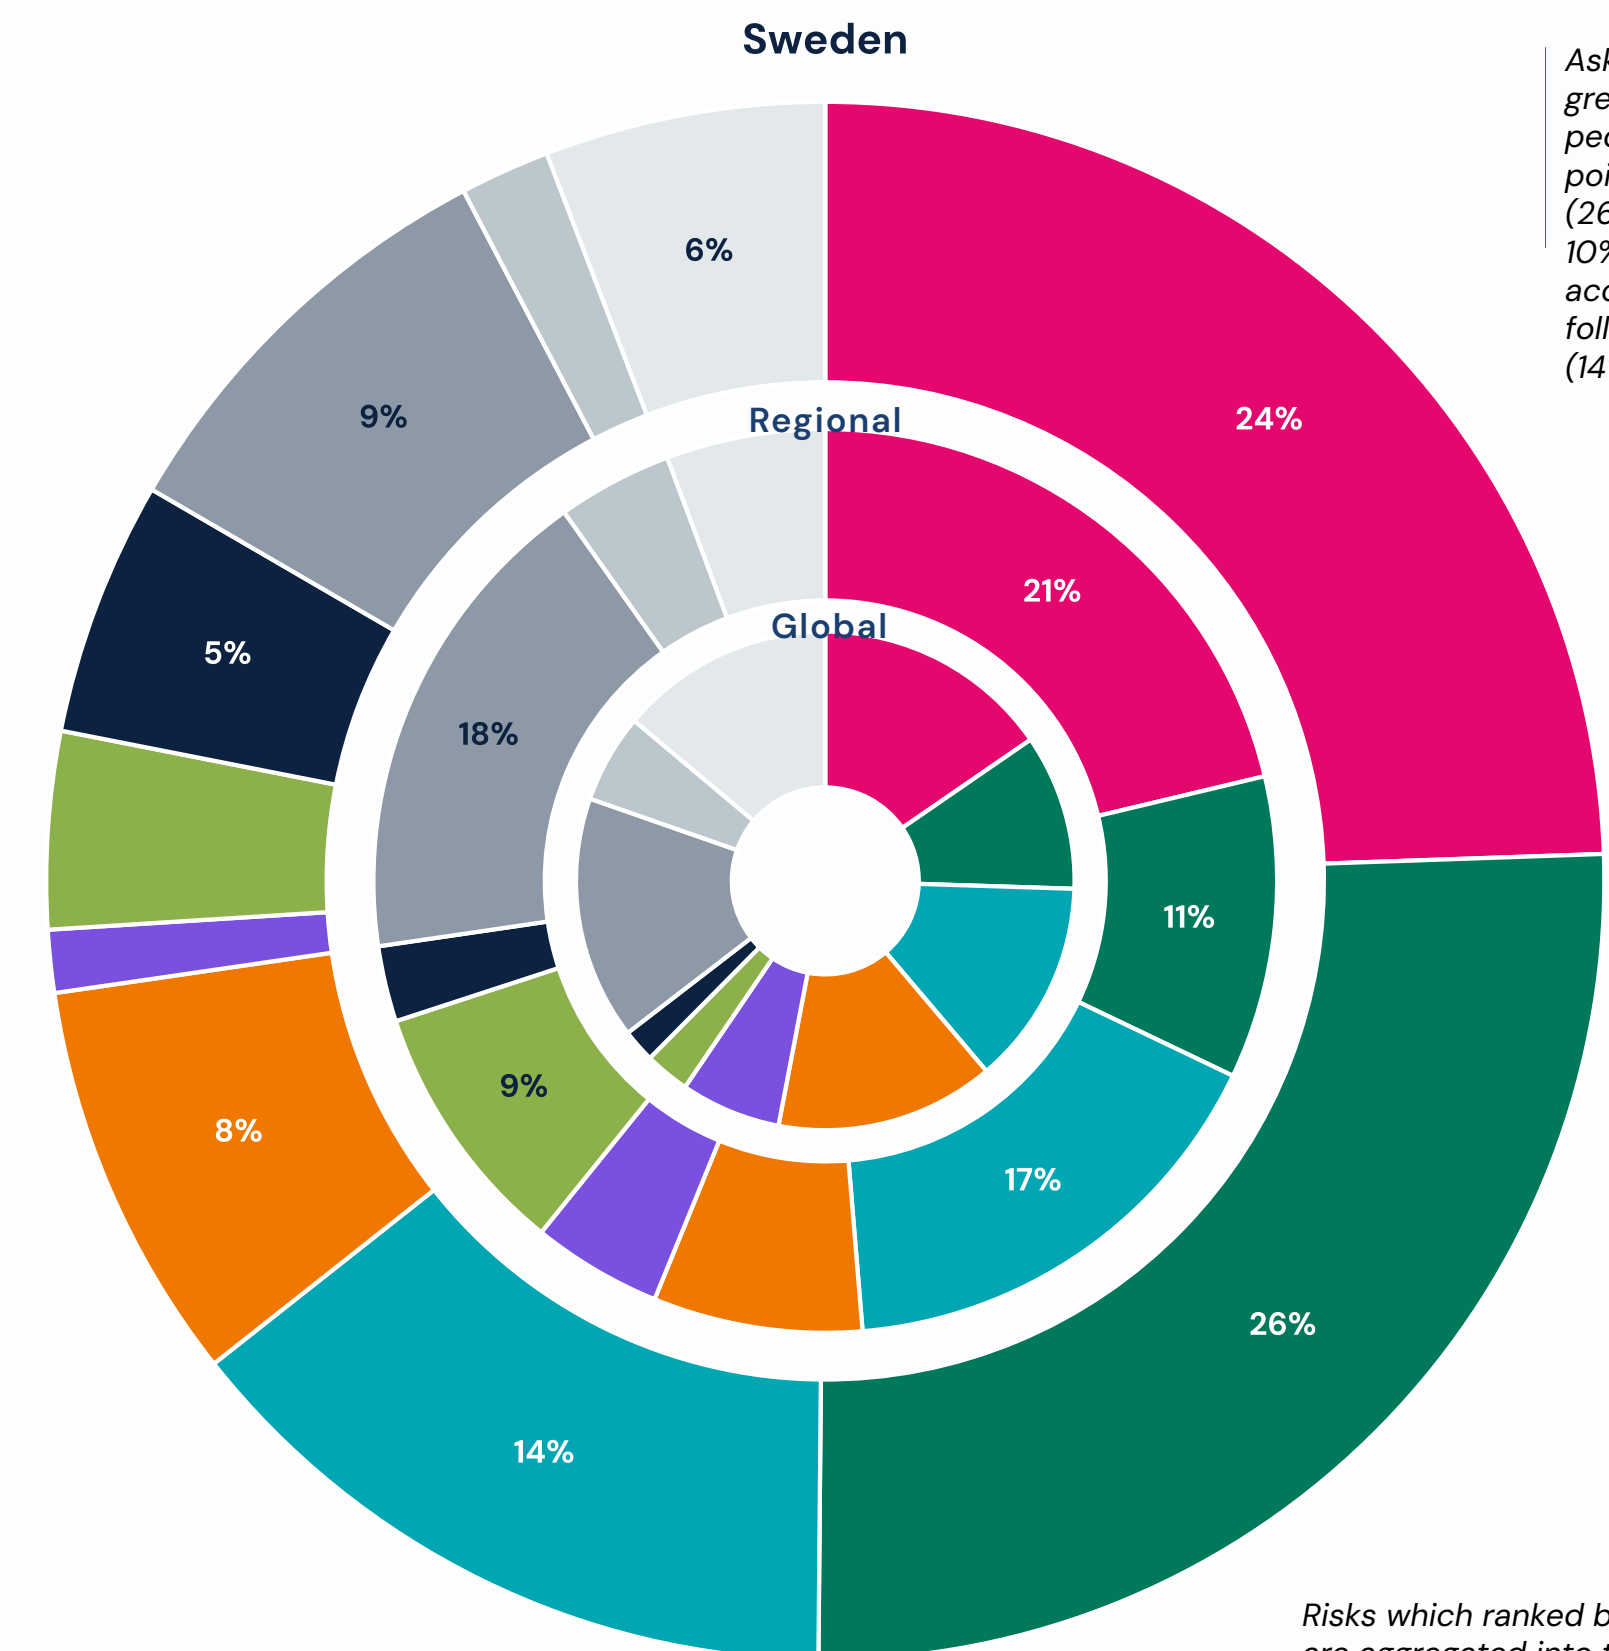

Dashed lines represent global average.
Dotted lines represent regional average.

People in Sweden are most worried about wildfires (54%) and prolonged severe weather (53%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Sweden runs lower than the global average. Concern far outstrips lived experience, however: while 54% worry about wildfires, only 2% have actually been harmed by it in the past two years. The harm most commonly experienced in Sweden is mental health issues (15%). The gap between worry and experience is widest for wildfires, where 54% are worried but 2% have actually been affected.
