

Worry and experience of harm from everyday risks

People in Tajikistan are most worried about road and traffic accidents (80%) and prolonged severe weather (70%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Tajikistan runs lower than the global average. Concern far outstrips lived experience, however: while 80% worry about road and traffic accidents, only 3% have actually been harmed by it in the past two years. The harm most commonly experienced in Tajikistan is the food they eat (5%). The gap between worry and experience is widest for road and traffic accidents, where 80% are worried but 3% have actually been affected.

Top of mind risk to safety

- Road and transport
- Crime and violence
- Health
- Economy and financial
- Climate and severe weather
- War/terrorism
- Work
- Other risks*
- Nothing/No risk
- Don't know

Asked to name the single greatest risk to their daily safety, people in Tajikistan most often point to road and transport accidents (15%), in line with the global figure of 15%. Health problems ranks second (13%), followed by climate change and severe weather (8%).

Risks which ranked below 2% of the global average are aggregated into this 'Other risks' category.
