

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

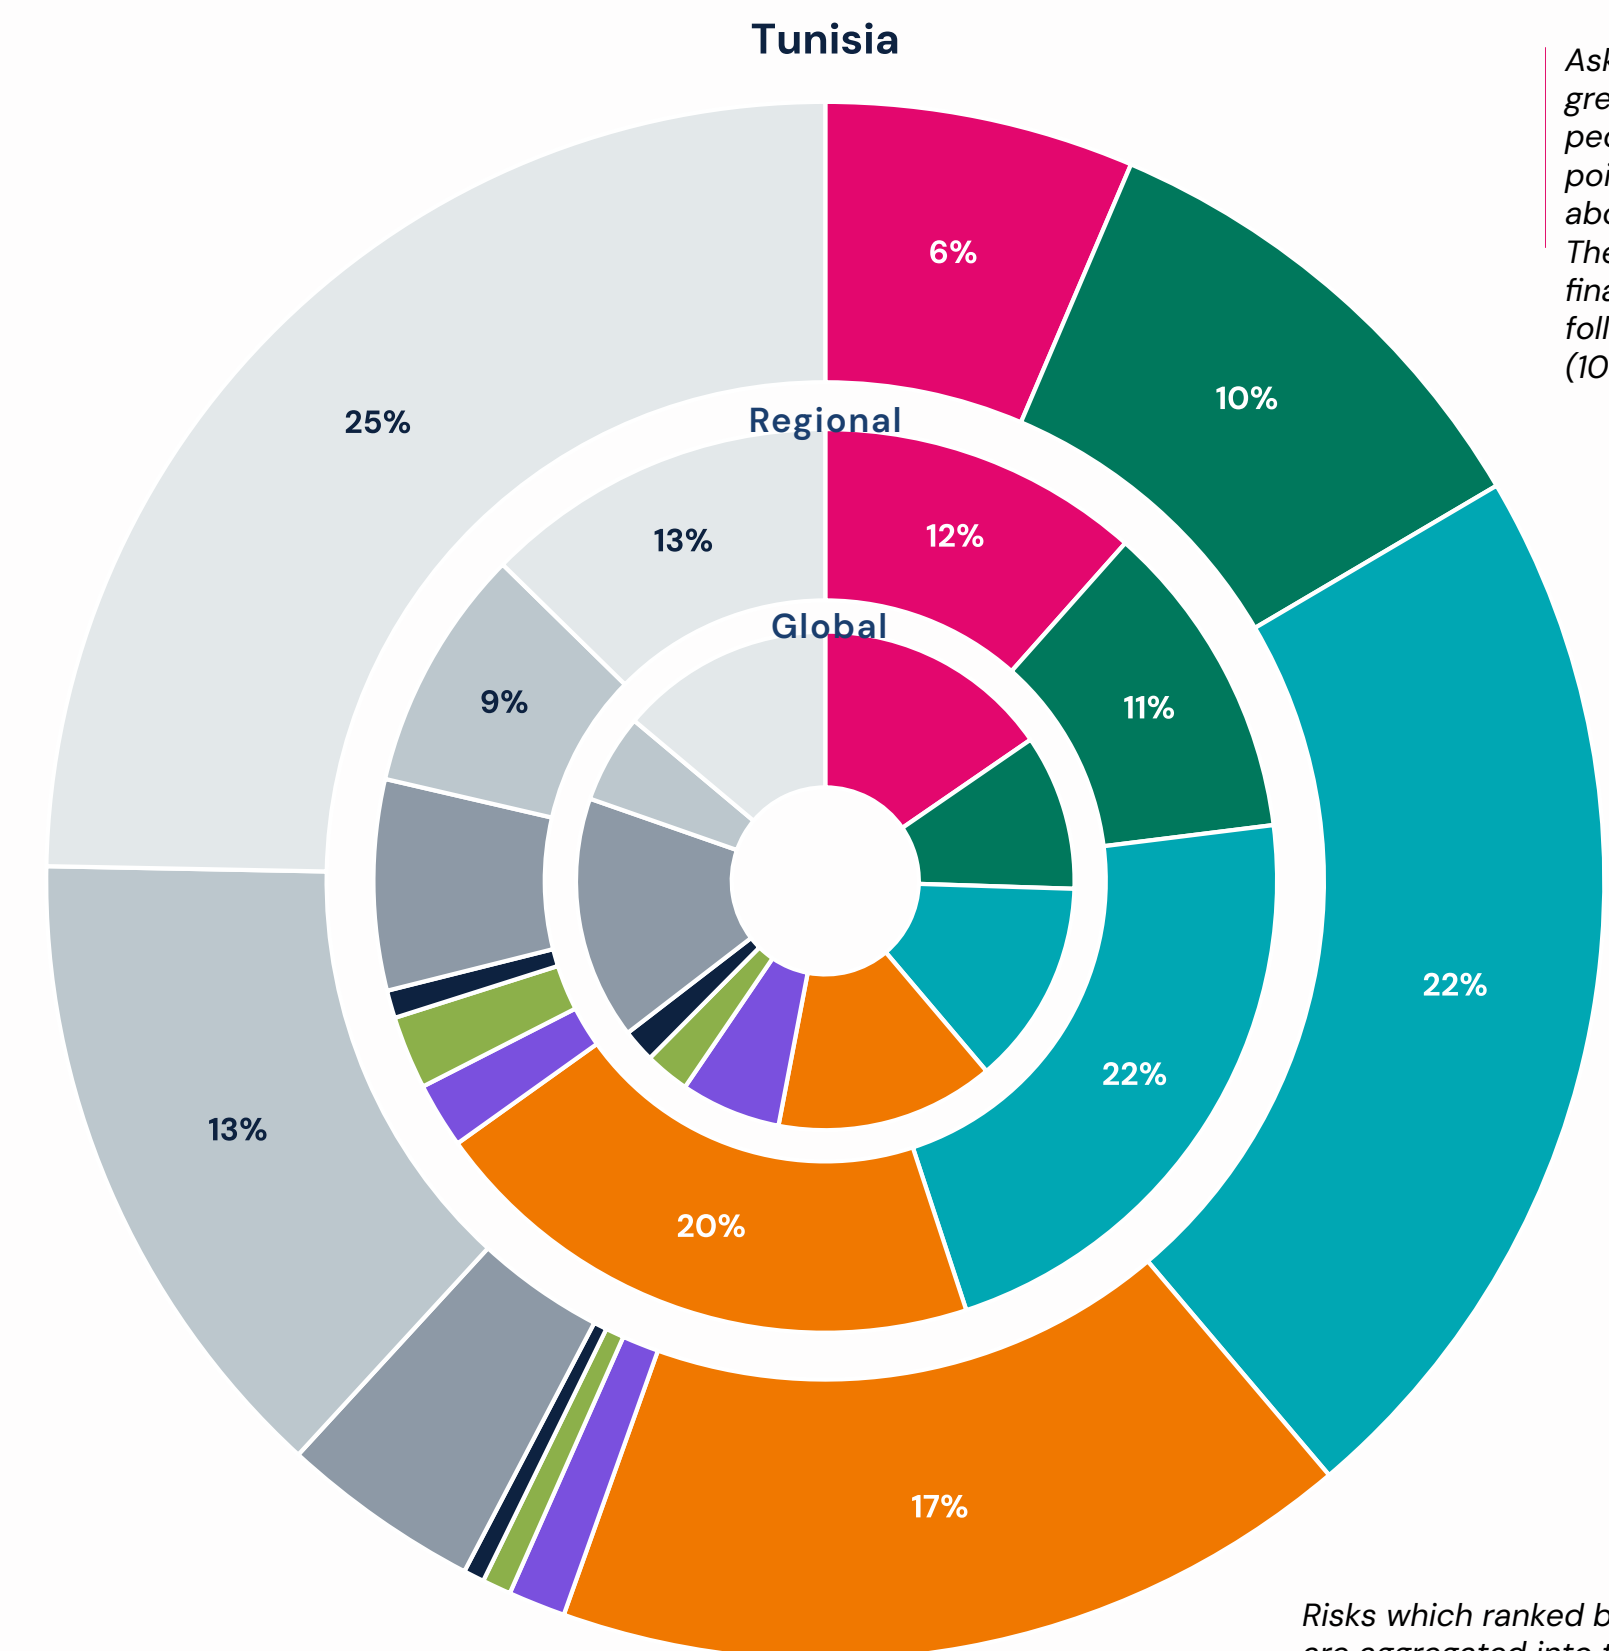

Dashed lines represent global average.
Dotted lines represent regional average.

People in Tunisia are most worried about prolonged severe weather (67%) and road and traffic accidents (67%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Tunisia runs lower than the global average. Concern far outstrips lived experience, however: while 67% worry about prolonged severe weather, only 18% have actually been harmed by it in the past two years. The harm most commonly experienced in Tunisia is prolonged severe weather (18%). The gap between worry and experience is widest for road and traffic accidents, where 67% are worried but 6% have actually been affected.
