

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

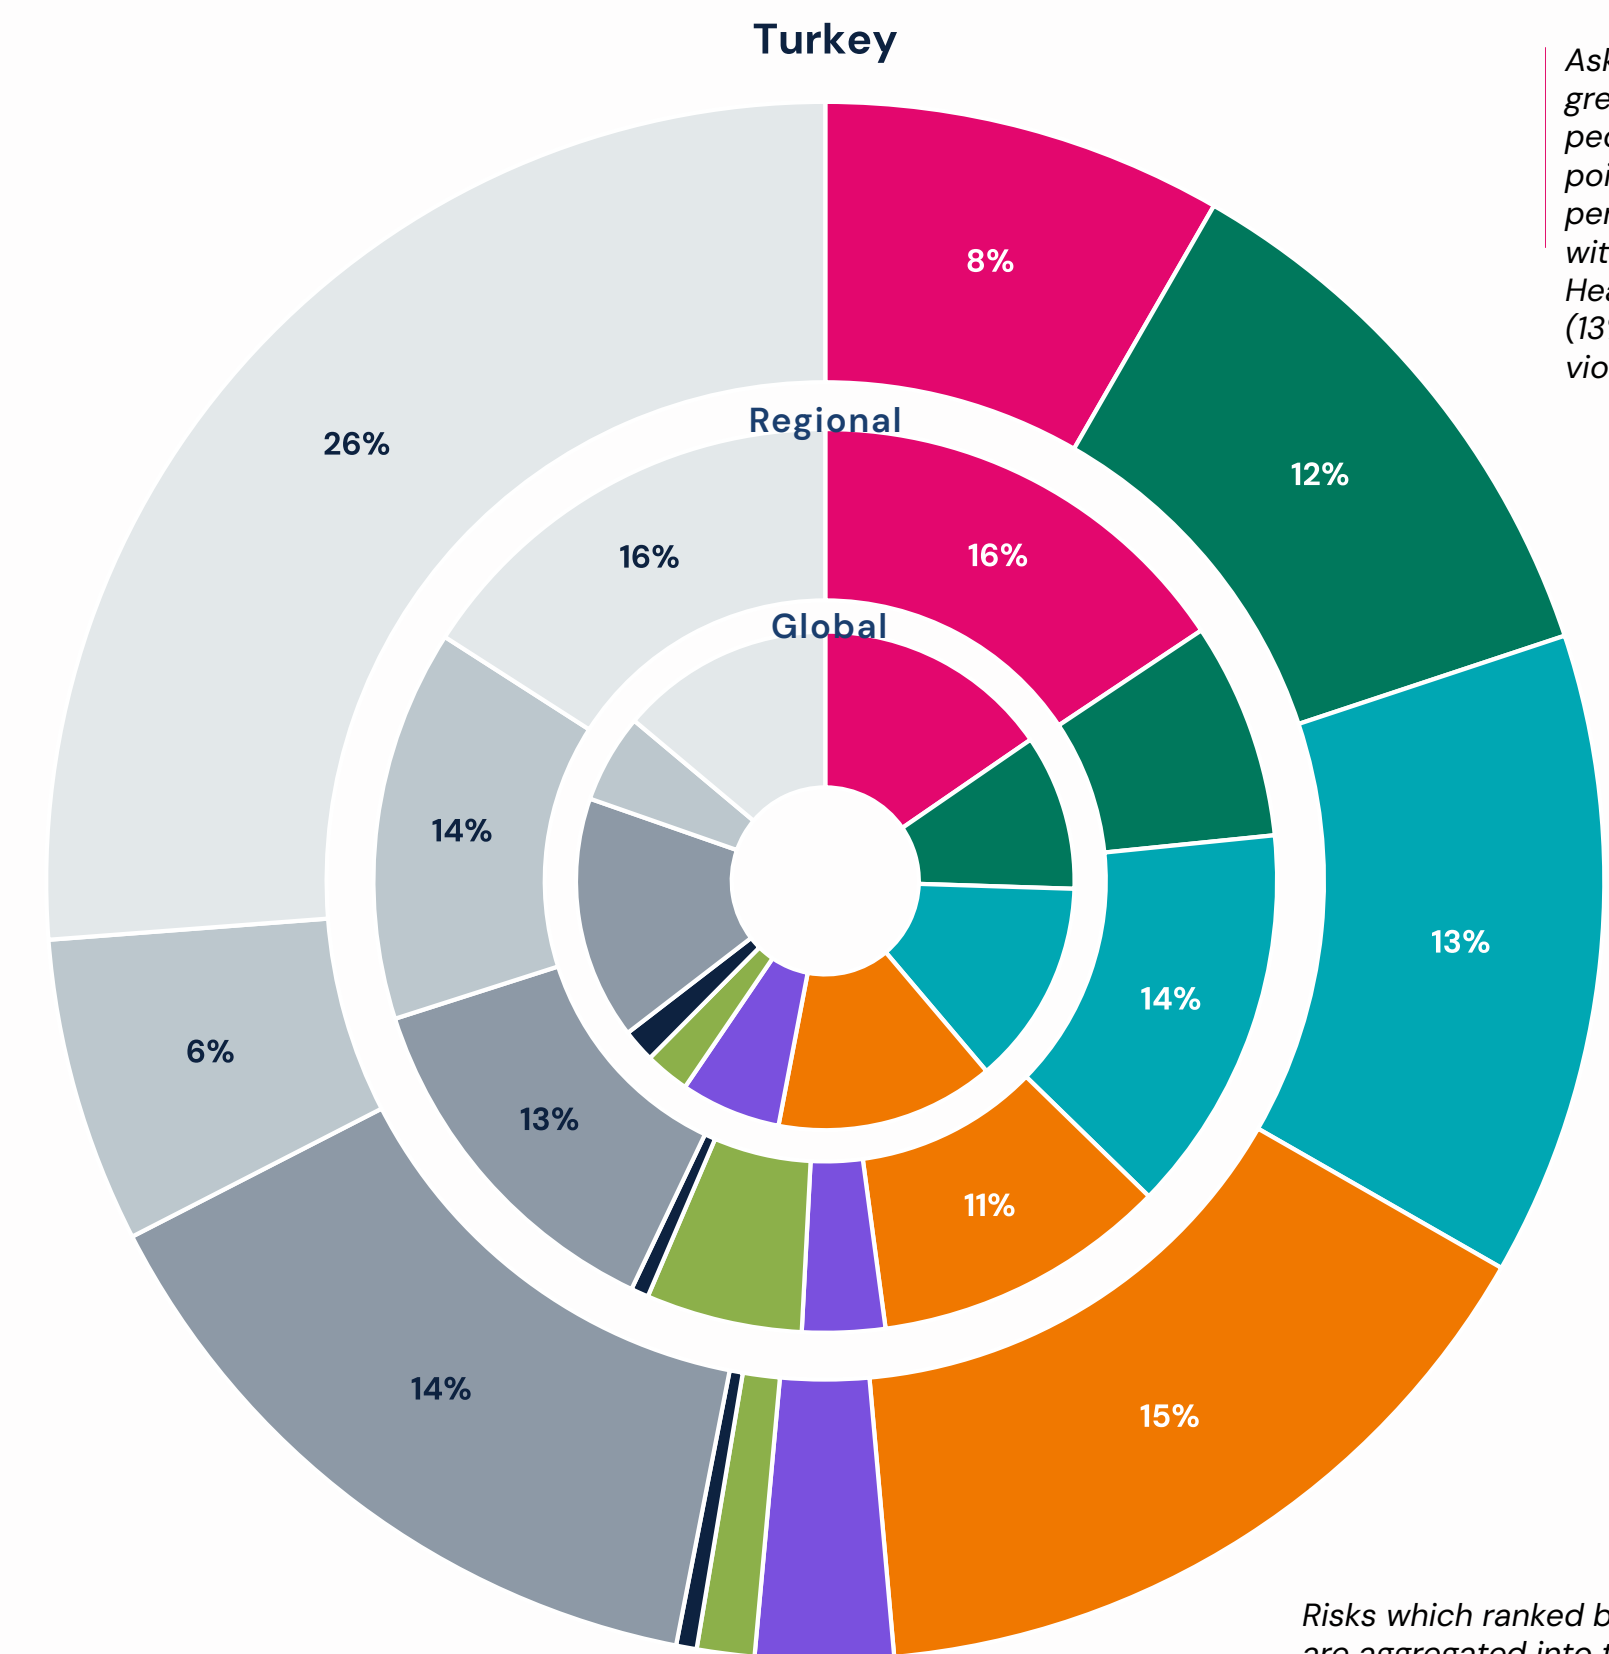

Dashed lines represent global average.
Dotted lines represent regional average.

People in Turkey are most worried about wildfires (90%) and prolonged severe weather (79%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Turkey runs higher than the global average. Concern far outstrips lived experience, however: while 90% worry about wildfires, only 5% have actually been harmed by it in the past two years. The harm most commonly experienced in Turkey is road and traffic accidents (9%). The gap between worry and experience is widest for wildfires, where 90% are worried but 5% have actually been affected.
