

Worry and experience of harm from everyday risks

People in Uganda are most worried about road and traffic accidents (87%) and violent crime (76%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Uganda runs in line with the global average. Concern far outstrips lived experience, however: while 87% worry about road and traffic accidents, only 20% have actually been harmed by it in the past two years. The harm most commonly experienced in Uganda is prolonged severe weather (23%). The gap between worry and experience is widest for road and traffic accidents, where 87% are worried but 20% have actually been affected.

Top of mind risk to safety

Asked to name the single greatest risk to their daily safety, people in Uganda most often point to health problems (19%), above the global figure of 13%. Road and transport accidents ranks second (19%), followed by crime and violence (18%).

Risks which ranked below 2% of the global average are aggregated into this 'Other risks' category.
