

Worry and experience of harm from everyday risks

People in Uruguay are most worried about road and traffic accidents (82%) and violent crime (78%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Uruguay runs in line with the global average. Concern far outstrips lived experience, however: while 82% worry about road and traffic accidents, only 6% have actually been harmed by it in the past two years. The harm most commonly experienced in Uruguay is prolonged severe weather (11%). The gap between worry and experience is widest for road and traffic accidents, where 82% are worried but 6% have actually been affected.

Top of mind risk to safety

Asked to name the single greatest risk to their daily safety, people in Uruguay most often point to crime and violence (30%), above the global figure of 10%. Road and transport accidents ranks second (15%), followed by health problems (14%).

Risks which ranked below 2% of the global average are aggregated into this 'Other risks' category.
