

Worry and experience of harm from everyday risks

Worry + country value
Experience + country value

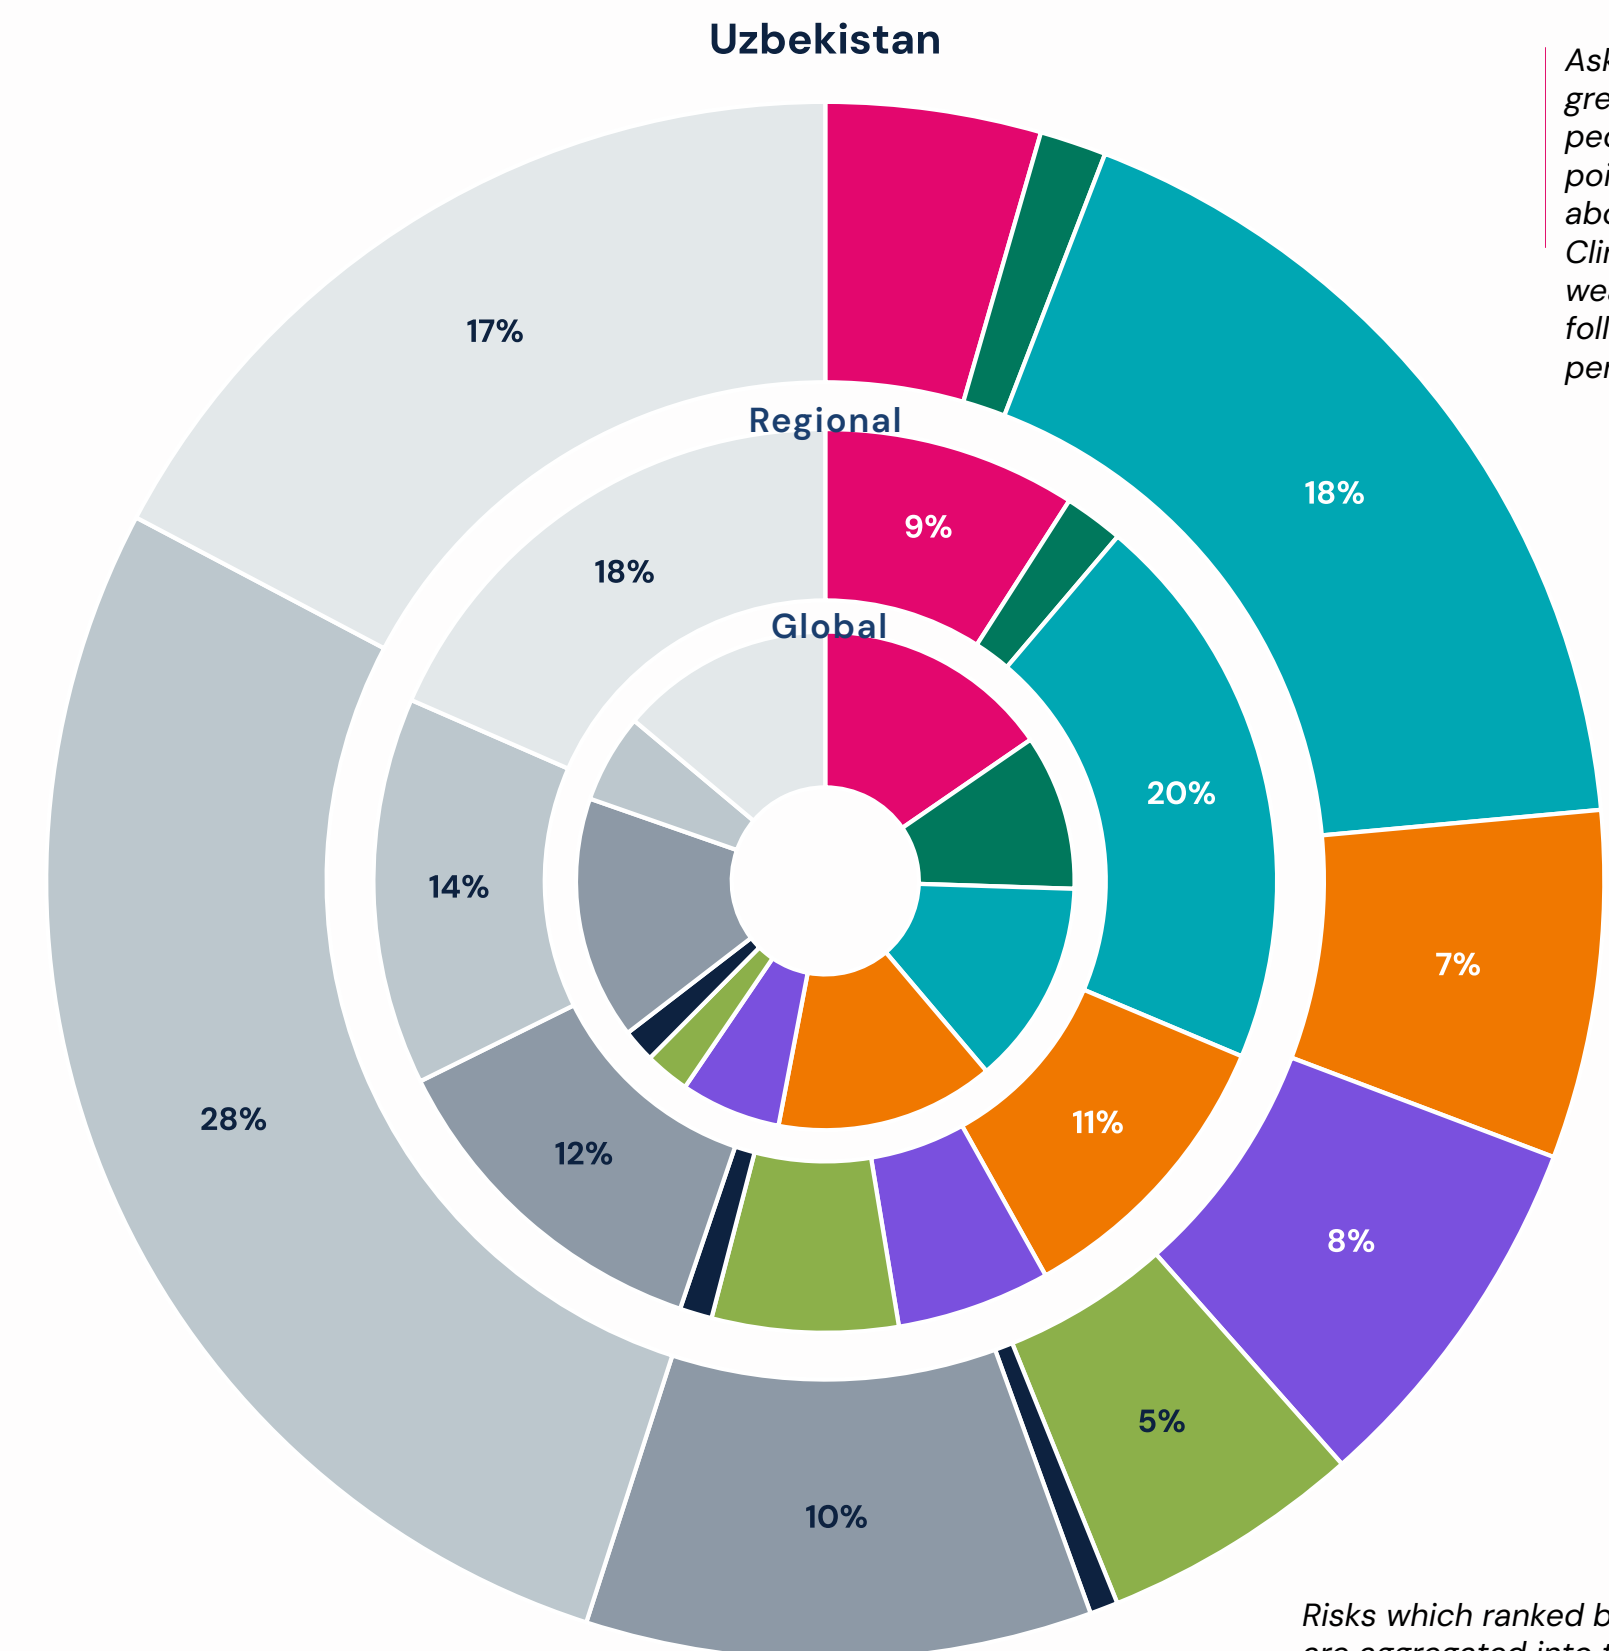

Dashed lines represent global average.
Dotted lines represent regional average.

People in Uzbekistan are most worried about prolonged severe weather (71%) and road and traffic accidents (63%) causing them serious harm, the two highest levels of concern among the ten risks asked about. Across all ten, worry in Uzbekistan runs lower than the global average. Concern far outstrips lived experience, however: while 71% worry about prolonged severe weather, only 9% have actually been harmed by it in the past two years. The harm most commonly experienced in Uzbekistan is prolonged severe weather (9%). The gap between worry and experience is widest for prolonged severe weather, where 71% are worried but 9% have actually been affected.
